ACKNOWLEDGEMENT

I sincerely wish to express my sense of gratitude and indebtedness to Dr. K. KOTRESHA, Selection Grade Lecturer (Reader), Department of Botany, Karnataka Science College, Dharwad and Dr. S. GANGAPRASAD, Associate Professor and Head, Department of Genetics and Plant Breeding, College of Agriculture, Shimoga for their inspiring guidance, constant encouragement and painstaking assistance which enabled me to undertake the studies reported in this thesis. The timely guidance assistance and scientific support received from my guides is sincerely acknowledged.

I wish to place on record the support received from the “Molecular profiling the genetic diversity and molecular characterization of elite selections of tamarind (Tamarindus indica L)” research project funded by Department of Biotechnology, Government of India, New Delhi.

I sincerely acknowledge the encouragement and support extended by the authorities and staff institution, Principal Karnataka Science College, Dharwad, Staff of Botany Department, Karnataka University, Dharwad (KUD), Department of Genetics and Plant Breeding, University of Agricultural Sciences, Dharwad and Institute of Agri-Biotechnology, UAS, Dharwad.

I am thankful to the staff of libraries of Karnataka University, Dharwad, University of Agricultural Sciences, Dharwad, University of Agricultural Sciences, Bangalore and National Informatics Center, IISc, Bangalore for extending the library facility. Various technical notes, textbooks, journals, periodicals, conference proceedings are referred in the preparation of the text of the thesis and I sincerely grateful to all authors.

I express my gratitude to authorities of the Karnataka University, Dharwad, University of Agricultural Sciences, Dharwad, University of Agricultural Sciences, Bangalore for providing the support and facilities to carry out this investigation.

I acknowledge the help received from Dr. P.M.Salimatt, Professor and Head, Department of Genetics and Plant Breeding, Dr. M.V.C.Gouda, Professor, Department of Genetics and Plant Breeding, Dr. Kuruvinashetty, Director, Institute of Agri-Biotechnology, Dr. Krishnaraj, Associate Professor, Institute of Agri-Biotechnology, Dr. Fakruddin, Assistant Professor, Institute of Agri-Biotechnology, Dr. R.L. Ravikumar, Professor, Department of Genetics and Plant Breeding, and Dr. O. Sridhevi, Associate Professor, Department of Genetics and Plant Breeding, University of Agricultural Sciences, Dharwad.

The help and suggestion rendered by Dr. Shilaja Hittalamani, Professor, Department of Genetics and Plant Breeding, Dr. T.E.Nagaraja, Associate Professor of Genetics and Plant Breeding, Dr. M. Shivamurthy, Professor, Department of Agricultural Extension, Dr. A.S.Kumaraswamy, Director of Instruction (Agri), Dr. S.U.Patil, Associate Professor of Agricultural Entomology, University of Agricultural Sciences, Bangalore are gratefully acknowledged. I also acknowledge the help received from Shri Mallikarjunappa of KUD and Hanmareddy Biradar MAS Lab, G.K.V.K. Bangalore.

I acknowledge the support received from my family members to peruse the Ph.D. and helping me during the period of investigation.

(M.H.Savith)
