Let me first express my deep respect and gratitude to Dr. N.M. Bajpale, for agreeing, in the first place, to be my research guide and introducing to me the interesting aspects of wavelet theory, an exciting area of research. His constant encouragement, fruitful discussions and many helpful ideas during the entire period of my research made this endeavor stimulating and rewarding. His unfailing support and understanding during the seemingly endless period of my research work and subsequent writing of this thesis go a long way in strengthening our student-guide relationship. He has always inspired me to investigate various topics, all the while guiding me in the right directions.

I must thank Prof. V.A. Hremath, the chairman, Dept. of Mathematics, Prof. H.B. Wadker, the Chairman, Dept. of Computer Science, Dr. (Miss) S.C. Helekatte, the Administrator, and Dr. T. Venkesh, Local Head, K.U.K.R.C. P.G. Centre, Belgaum, profusely, for their unshakable faith in my ability to accomplish the task I have undertaken.

My special thanks are due to Prof. C.R. Katoddeppa, for his moral support and actual help in procuring numerous reference books and articles.

I am forever grateful to members of the faculty Prof. S.S. Bhosmarne, Prof. SS. Bencalli, Dr. B. Basangoud and Dr. (Miss) V.S. Shephedlutt for their inspirational remarks and helping me to sustain my interest all the while. These people have provided better insights and deeper understanding about interdependence of various disciplines of mathematics, through many interesting discussions and helpful conversations both within and outside my area of research.

My grateful thanks are due to Dr. Ramesh B. Kadapati, University of Bangalore, and Sri. S.C. Skindekutti, S.D.M. College of Engg and Technology, Dharwad for having collaborated with me and co-authored several research articles. We had many good and productive discussions.

I would like to thank various authors of books and research articles whose fine work helped me to get started and referees for their constructive criticism and helpful suggestions in improving my articles.

Many people deserve thanks for helping me to keep my interest alive by their encouraging remarks. They include Dr. Kadi, Dr. Patwardi, Dr. Sangam, Dr. Dhande, Dr. Mallme, Dr. Kalsakutti, Dr. Kamodli, Dr. Kalmadi, Dr. Waghmare, Dr. Jakkaswamy Kalsepp, Sri. Giriy, and host of others whose names it is difficult to recall.

It is a pleasure to acknowledge with gratefulness the librarian and staff of the university library for providing the necessary intellectual atmosphere and interactive environment for reading, writing and referencing throughout my research work.
I thank the university authorities for providing me the necessary infrastructure and research facilities for carrying out my research work.

I would like to use this opportunity to thank immensely my friends, relatives and all people who gave me their time and support during my years as a research student.

Dr. Betti, Dr. Ameli, Dr. Katagi, Dr. Benchalli, Dr. Madelli, Mr. Chemaraddi and Mr. Padmanabha Reddy and all my co-research and M.Phil scholars for their help and support, in some way or the other, deserve my heartfelt thanks.

I conclude this list of thanks, by coming to a full circle, expressing my deep sense of gratitude to my brother Shri. Rajasekhar, who certainly played a direct and decisive role in my choice of career as a teacher.

Last but not least, I thank my wife Smt. Rajeshwari and son Chh. Vinay, my nephew Chh. Sharad for their infinite patience; understanding and continued support without which my long cherished desire would have remained unfulfilled.

Dharwad
