Acknowledgment

It gives me great pleasure to acknowledge my indebtedness to Dr. N.M. Badiger, my thesis supervisor, for his concern and encouragement during the course of this thesis work and motivating me to carry out research work in nuclear physics. I am grateful to Dr. N. M. Badiger for giving me opportunity to work in research project (Ref. UFUP-32313) entitled “Nuclear fusion-fission time scale measurements” supported by Inter University Accelerator Centre (IUAC), New Delhi.

I wish to express my deep sense of gratitude to Mr. N. Madhavan for his invaluable guidance and encouragement ever since I came to IUAC, New Delhi. He has shown me the path and lighted it for me through his useful suggestion, thorough discussion during the data analysis, interpretation of the results. The amiable discussion I had with him gave me a better insight into the thesis problem. The completion of this thesis owes very much to his support, his keen interest and involvement in the work. I owe all my experimental knowledge to him.

I take this opportunity to express my deepest gratitude to Mr. Subir Nath for his constant encouragement, moral support, active involvement and many fruitful suggestion during the course of this thesis work. I am very much thankful to him for many valuable suggestions in manuscripts preparation. Special thanks to Mr. Subir Nath for thoroughly correcting the thesis. My heartfelt thanks for all his support, concern and affection.

I would like to thank other members of HIRA and GDA groups, Mr. Akhil Jhingan, Mr. P. Sugathan, Mr. Jagdish Gehlot, Mr. J.J. Das, Mr. Thomas Varughese, Mr. S. Muralithar, Mr. Rakesh Kumar and Mr. R.P. Singh for their valuable discussions at various stages of my research work and without their help it would have been difficult to complete the experimental work successfully, working with them during these years in various experiments has helped me to know the basics of becoming good experimentalists. I thank Miss K.S. Golda for many helpful discussions. Special thanks are due to Pelletron
Lab, Target Lab, Data support Lab, Computer Lab, Workshop of IUAC for the support they have provided, for and during the experiments at IUAC. I would like to thank especially to Mr. E.T. Subramaniam for helpful discussion in related to data acquisition software and Mr. Rajan Joshi for providing the pulsed beam of required rate for the experiments.

I express my deepest gratitude to Dr. Amit Roy for the support and encouragement provided during the course of this work. I am grateful to him for providing the congenial atmosphere and good facility which helped me immensely during my work.

I take this opportunity to express my sincere thanks to Prof. V.S. Ramamurthy for many of the fruitful discussions and many suggestions on this work.

I am grateful to Dr. S.K. Datta and Dr. R.K. Bhowmik and Late Prof. C.V.K.Baba for discussion and professional advices. I am particularly grateful to Dr. A. K. Sinha for his invaluable suggestions and discussions throughout the period of this work. I wish to express my sincere gratitude to Dr. Santanu Pal for his suggestion, fruitful discussion and the interpretation of the results. The amiable discussion I had with him gave me a better understanding of statistical model code. Special thanks to Dr. Santanu Pal for giving the feedback of Chapter 5.

I am grateful to Prof. Raghuvir Singh, Prof. K.M. Varier, Prof. M.C. Radhakrishna, Dr. B.R. Behera, Dr. S. Mandal, Dr. P.V.M. Rao for there support, valuable advices and useful discussions.

I express my deepest gratitude to Prof. N. Umakantha for his moral support and encouraging words.

I express my sincere thanks to Prof. S.S. Kubakaddi, Head of the Department of Physics, Karnataka University Dharwad (KUD), Prof. B. Hanumaiah, Prof. S. R. Thontadarya and all academic and non-academic staff of the physics department, Karnataka University Dharwad for their constant support and help.

I remember with great pleasure my friends Rishi, Hardev, Kushal Kalita, Shashi
Verma, Prasad, Ranjeet, Appana Babu, Anukul, Dinesh, Abhilash, Pushpendra, Dhar-
mendra, Rabbar, Sankar, G. K. Padmashree, Pankaj, Sugam Kumar and Vikas for their support and for making my days cheerful and enjoyable at IUAC. Their company and friendship refreshed and energized me during my research work.

I am eternally grateful to my seniors Dr. S.V. Nayak, Dr. P.G.Patil. Dr. S. B. Gudennavvar and my friends Savita Hosur, Devaraj, Dr. T.D. Rayanagoudar, Sortur, Mallesh, Kalsad, James for their support. Their company made my days enjoyable and unforgettable at Karnatak University Dharwad. Special thanks to Miss Savita Hosur for helping me during the final stage of thesis work.

I am grateful to Inter University Accelerator Centre (UFUP-Project), Council of Scientific and Industrial Research (CSIR), Department of Science and Technology, Indian National Academy of Science (INSA) for providing financial assistance.

None of this would have been possible without the constant support and encouragement of my parents, sisters, brother-in-law, relatives and well-wishers throughout. I am really at a loss of words to express my obligation to my parents who have supported me all through, and allowing me to proceed smoothly with my work. This thesis owes most to them. At this moment I very much remember with gratitude my sisters, Sumitha and Deepa and brother-in-law, Mr. Nagraj Khoday who always insisted on giving my research work as the first priority and encouraged me to produce my best. I gratefully acknowledge my Mausaji Mr. B. R. Kolhapure M.A., B.Ed. Solapur, Mr. M. N. Ladwa Harihar, and uncle Mr. M. P. Shidling Gadag, for the affection and inspiration they have accorded on me throughout my research work. I thank each and every one who has helped me at some stage or the other in making this thesis possible. On completion of this thesis, I miss very much my cousin brother Shankar, who is no more by my side to share my moments of joy. I dedicate this thesis to my beloved parents and to the sacred memory of my cousin brother.
