ACKNOWLEDGEMENTS

“Your right is to work only and never to the fruit thereof,
Do not be the cause of fruit of action; nor let your attachment be to inaction”

The God-The creator-The supreme Power-The Light or whatever He is, has helped me in all adversities, at every step, on each moment, I will remain indebted to HIM always because “He is the cause of every cause”. Every effort is motivated by an ambition and all ambitions have an inspiration behind. Words in lexicon would be few exiguous to express my deep sense of gratitude for my loving parents, for their selfless sacrifices and heartfelt blessings throughout my life. I owe all my success to them only.

I feel ecstatically delighted in expressing my unbound gratitude and profound personal regards to esteemed chairman of my advisory committee Dr. Akhilesh Sharma, for his sage advice, insightful criticisms, untiring efforts, constant inspiration, unparalleled execution and patient encouragement, which aided in writing of this thesis in innumerable ways. His perpetual energy and enthusiasm in research had motivated all his advisees, including me. In addition, he was always accessible and willing to help me with my research at the loss of his personal comforts. As a result, research life became smooth and rewarding for me.

I feel highly privileged to express my exorbitant gratitude and indebtedness with limitless modesty towards Honourable Vice chancellor Dr. S. K. Sharma, Dr. R. K. Sharma, Dean, Post graduate studies, Dr. S. P. Sharma, Director of Research and Dr. Vidyasagar, Professor and Head for extending all necessary facilities as and when required.

No expression of thanks will be justified without recognition of intelligence and professional dexterity of Dr. Yudhvir Singh, Dr. K. C. Sharma, Dr. J.D. Sharma and Dr. D. K. Banyal, the worthy members of my advisory committee. Thanks are due to all respected teachers of my department, especially Dr.N.K. Pathania, Dr. K.S. Chandel, Dr. Sonia Sood, Dr. Desh Raj, Dr. Praveen Sharma, Dr. Sanjay Chadha, Dr. Pradeep Kumar and Dr. Viveka Katoch for their constant encouragement, ideological contribution, prized suggestions and concern over my professional growth will always be cherished. My vocabulary falls short of words to express my deep sentiments to all the teachers and friends of JNV, UHF and HPAU for bringing the best out of me in different phases of life.

I feel great contentment to express my highest veneration and heartfelt gratitude to Dr. Pritam Kalia, Dr. Kulbir Singh, Dr. Priyaranjan, Ajay sir and Alem for providing me the different genetic material for this investigation; Dr. J. K. Sharma and Dr. R.S. Jamwal for their moral support and ever helping attitude.

My deepest gratitude goes to my family for their unflagging love and support throughout my life; this investigation is simply impossible without them.

Furthermore, I am grateful to come across several life-long friends. So I am conscious of my feelings to my seniors, friends and loving juniors, for their nice, memorable and lively jovial company.

Financial assistance received amid study as University merit scholarship and senior research fellowship is duly acknowledged. The generous support from office, field and laboratory staff of Department of Vegetable Science, HPKV and HAREC, Bajaura is greatly appreciated.

I would like to thank Sh. Ajay Walia for bringing this manuscript in wonderful form. Needless, to say, errors and omissions are mine.
