ACKNOWLEDGEMENTS

During the long span of preparing this thesis, I have taken help at various stages from various sections. Without that, I would not have been able to complete this work. So it is my pleasant duty to record my sincere thanks to all of them.

I am, indeed very much grateful to my research guide Dr. T. T. Basavanagouda, Reader, Department of Anthropology, Karnatak University, Dharwad for the patience and kindness with which he supervised this thesis. To be candid, I owe my training in genetical research to him only.
