ACKNOWLEDGEMENTS

My greatest thanks to my esteemed guide Dr. (Mrs.) CYNTHIA PANDIAN, M.A., M.Ed., M.Phil., Ph.D., for her patience, insight and constant support. She is the example of provocative, challenging and original scholarship. She provided much needed guidance as the study developed and rendered the professional expertise. Her guidance and freedom facilitated my growth as a scholar, and persistently helped me develop clarity in my thinking.

During the course of this research study there were a number of difficult situations, during which my guide was a source of strength and wisdom. She contributed so much time, enthusiasm, energy, and expertise in guiding this project to its completion. Finally, I should express my gratitude to my guide, whose understanding helped me immensely during the writing of this dissertation.
I thank my Parents, Brothers and Sisters for having provided an environment of encouragement and belief in me that has given me the confidence to reach new goals in life. My special thanks to my sister Dr. SHANTHY and my brother A.P. RAVI, without whose constant support, and affection the following pages could not have materialized. To them I owe a great debt.

Whenever one undertakes a doctoral research, the emotional, intellectual, and time commitments are enormous for many people other than the doctoral candidate. To all who made those Commitments on my behalf, I wish to express my heartfelt gratitude.
