LIST OF TABLES

Chapter I
Table No and Title Page No.
1.1 Details of expenditure on Hand Pump (HP) Bore wells...........15
1.2 Details of expenditure on Mini Water Supply Schemes (MWS).....16
1.3 Details of expenditure on Piped Water Supply Schemes (PWS).....17
1.4 Details of progress achieved on rural water supply and
   Sanitation expenditure..........................................................24
1.5 Households having access to safe drinking water in
   Percentage..................................................................................28
1.6 Households with toilets in percentage......................................29
1.7 The district wise details of physical and financial progress
   achieved during last four years in Karnataka under
   Total Sanitation Campaign (TSC).............................................30
1.8 The district wise coverage of Rural Water Supply in Karnataka
   (End of 01-04-2007.)...............................................................32

Chapter II
2.1 Details of Zilla Panchayat presidents and Vice Presidents.......61
2.2 Details of Taluka Panchayat presidents and Vice Presidents.....61
2.3 Details of Gram Panchayat presidents and Vice Presidents......62
2.4 Details of total picture of elected members from Panchayat
   Raj Institutions (PRI)..............................................................62
2.5 Status of Ground Water in Karnataka....................................65

Chapter III
3.1 Karnatak State Basic Statistics..............................................100
3.2. Chitradurga District profile..................................................102
3.3 Gulbarga District profile.......................................................105
3.4. Profile of the study villages in Danida project............... 108
3.5. Profile of the study villages in World Bank project........... 109
3.6. Details of villages covered under Danida project (Beneficiaries)..110
3.7. Details of villages covered under World Bank project
   (Beneficiaries) ........................................................................ 111
3.8 Details of Government staff ................................................. 111
3.9 Details of Project staff ....................................................... 112

Chapter IV
Chapter-IV-A
Section 1 Profile of the Beneficiaries

4. A.1.1. Age group details of the Beneficiaries......................... 132
4. A 1.2. Gender Composition of the Beneficiaries...................... 133
4. A 1.4. Educational level of the Beneficiaries ......................... 135

Section 2 Water Resources

4. A 2.1 Details of Traditional water resources......................... 140
4. A 2.2 Usage of Traditional water resources for drinking........ 141
4. A 2.3 Safety of available traditional water resources............. 142
4. A 2.4 Details of old water resources and its sufficiency........ 144
4. A 2.5 Distance of Water resources from the beneficiaries
   residence..................................................................................... 145
4. A 2.6 Details of quantity of water available before project
   implementation.......................................................................... 146
4. A 2.7 Details of quantity of water available after project
   implementation.......................................................................... 147
Section 3 Process of Decision Making and Implementation in Rural Drinking Water Supply and Sanitation Projects

4. A 3.1. Type of water supply schemes provided under the projects........................................................................................................150

4. A 3.2. Nature of beneficiaries' family .................................................................................................................................151

4. A 3.3. Details of water scarcity before to the RDWS&S Projects implementation........................................................................152

4. A 3.4. Project introduction to the villages.................................................154

4. A 3.5. The process of decision making to accept the project for the village.........................................................................................156

4. A 3.6. Beneficiaries contribution for the project.....................................158

4. A 3.7. Participation of the beneficiaries by identifying the locations of the Project Components.............................................159

4. A 3.8. Details of women participation ........................................................160

4. A 3.9. Level of women participation .............................................................161

4. A 3.10. Awareness among the beneficiaries on criteria for the selection of VWS&SC members......................................................163

4. A 3.11. Awareness among the beneficiaries on tenure of the VWS&SC membership......................................................................164

4. A 3.12. Beneficiaries membership to the Village Quality Assurance Team (VQAT).................................................................165

4. A 3.13. VWS&SC member's attendance to the committee meeting.................................................................................................167

4. A 3.15. Quality of water perceived by the people......................................169

4. A 3.16. People's participation during Operation and Maintenance (O&M) orientation.................................................................171

4. A 3.17. Satisfaction about the quality of works executed.....................172

Section 4 Sanitation

4. A 4.1. Agencies approach for construction of IHHL's............................174
4. A.4.2. Details of Household Latrines possession

Section- 5 Operation and Maintenance (O&M)
4. A.5.1. Willingness of the villagers for operation and maintenance of the water supply and sanitation schemes

4. A.5.2. Operation & Maintenance training to the villagers

4. A.5.3. Technical support to the villages for O&M of the Water supply schemes

Multi variable Tables related to Beneficiaries
1.1. Level of women participation
1.2. Satisfaction of works executed by the PRED sub-divisions
1.3. Decision to accept the projects
1.4. Membership of the VWS&SC

Chapter-IV-B
Section.1 Demographic Data
4. B.1.1. Nature of work of the Project staff
4. B.1.2. Age Group of the Project Staff
4. B.1.3. Gender Composition of the Project Staff
4. B.1.4. Education level of the Project Staff
4. B.1.5. Monthly Income of the Project Staff
4. B.1.6. No. of years of service with the Project

Section.2 Project Mobilization
4. B.2.1. Role of the Project staff during project mobilization
4. B.2.2. Project mobilization meetings conducted by the project staff at different places
2.2 Villagers response to the project staff (Age of the project staff).... 208
2.3 Community Participation approaches used................................. 209
2.4 Satisfaction about the quality of works implemented
   (Education of the Project staff) ......................................................210

Chapter-IV-C
Section.1 Demographic Data
4. C.1.1. Nature of work of the Government staff ...................... 211
4. C.1.2. Age Group of the Government Staff.......................... 212
4. C.1.3. Education level of the Government Staff.................... 213

Section.2 Project Mobilization
4. B.2.1. Project mobilization meetings conducted by the
         Government staff at different places................................. 220

Section.3 Community Participation
4. C.3.1. Community participation approaches used by the
         Government staff................................................................. 221
4. C.3.2. Suggestions by the Government staff for
         implementation of community participation
         approaches................................................................................ 222
4. C.3.3. Problems faced with the community participation
         approaches............................................................................ 223

Section.4 Role of the Government staff during project
        Implementation
4. C.4.1. Role of the Government staff during project
        Implementation........................................................................... 224
4. C.4.2. Input given to the Village Water Supply and Sanitation
         Committees and Villagers......................................................... 225

Section.5 Sanitation
4. C.5.1. Input given for Household Latrines Construction.......... 226
4. C.5.2. Household Latrine promotion-Reasons for poor Progress ..................................................................................................................227

Section.6 Operation and Maintenance (O&M)
4. C.6.1. Persons responsible for Operation & Maintenance of Rural Drinking Water Supply and Sanitation schemes at villages .................................................................228
4. C.6.2. Components for calculation of Operation & Maintenance (O&M) Budget ...................................................................................229
4. C.6.3. Training to the Village Water Supply and Sanitation Committee (VWS&SC) members and Gram Panchayat Staff ..................................................................................230

Section.7 Consolidation
4. C.7.1. Phasing out strategy of the project .................................................................................................................................231

Multi variable Tables related to the Government Staff
3.1 Villagers response to the Government staff (Age group of the Government staff) ..................................................................................233
3.2 Villagers response to the Government staff (Education of the Government staff) ..................................................................................233
3.3 Community Participation approaches used .................................................................................................................................234
3.4 Satisfaction about the quality of works implemented (Nature of work of the Government staff) ...............................................................235
3.5 Satisfaction about the quality of works implemented (Education of the Government staff) ...............................................................235
