A SELECT BIBLIOGRAPHY

This bibliography has been assembled taking into account the main aspects of the life and activities of the Lambanis in the northern Karnataka area. References, old as well as new, have been given. The "all-through" method has been adopted in listing the various items. Various entries, books, reports, articles have been put together serially in the alphabetical order. The surname has been taken as the basis. Where the surname is not used or does not exist, the other name is taken as the basis. Where, as in some sources, names are not indicated, the reference has been listed as anonymous. The main emphasis on the coverage has been to include the works and projects or reports pertaining to the life and problems (or their solutions) of the Lambanis or other tribes belonging to the various parts of India. The Karnataka tribes, and the Lambanis in particular, have been given more attention in listing the references. The entries have been listed as completely and accurately as possible.
