List of Table

1.1 Features and functions of LMS. 3
1.2 Development of LMS. 4
2.1 Language and Model. 27
4.1 Order in format of Table 74
4.2 Vendor details 74
4.3 Relation 75

List of Figures

3.1 Object Identifier (OID). 53
3.2 Creation of user database. 56
3.3 Creation of Category and Entitlement. 56
3.4 Aggregation. 61
3.5 Specialization hierarchies for the library. 56
3.6 Class hierarchies corresponding to the library borrowers. 63
3.7 ISA hierarchy. 64
3.8 Classifications. 66
3.9 Collection and relations. 68
5.1 Integrated Library Information System. 96
5.2 System Interaction Diagram for the Acquisition. 96
5.3 System Interaction Diagram for the Technical processing. 97
5.4 Circulation System. 97
5.5 Current Journal. 97
5.6 BDMs. 98
5.7 Acquisition Module of BDM Model. 98
5.8 Processing of Books. 99
5.9 Circulation processing. 99
5.10 Serial Control.
5.11 Conceptual Data model of library.
6.1 E R Diagram Symbol.
6.2 E R Diagram for library In-House Operations Circulation.
6.3 E R Diagram for library In-House Operations Acquisition.
6.4 E-R Diagram for Circulation.
6.5 E-R Diagram for item, reserve, borrower.
7.1 Oracle enterprise Manager.
7.2 WebDB GUI interface.
7.3 Behavioral view of WebDB.
7.4 Ishikawa Diagram for overall system structure.
7.5 Data Definition Language.
7.6 Triggers.
7.7 Starting Database Application.
7.8 PL/SQL command through WebDB.
7.9 Class Creation Schema.
8.1 Work flow diagram in web enabled BDMS environment.
8.2 Four conceptual categories of web application.
8.2 Client / server connection.
8.4 Book Requisition Form.
