Content

1 Preamble.
  1.1 Preamble 1
  1.2 Genesis of Library Management Software in India 2
  1.3 Features of some leading Library Management software in India 4
  1.4 Statement of the Problems 7
  1.5 Need for the study 9
  1.6 Motivation 11
  1.7 Objectives 15
  1.8 Data Source 15
  1.9 Software used in the study 16
  1.10 Methodology 16
  1.11 Layout of the Thesis 17
  1.12 Reference 18

2 Object Oriented Databases: a survey 19
  2.1 Preamble 19
  2.2 Relational Model 19
  2.3 Nested Relational Model 22
  2.4 E-R Model 23
  2.5 Semantic Model 24
  2.6 Object Oriented Data Model 27
    2.6.1 Storage Organization 36
    2.6.2 Integrity Constraints 37
    2.6.3 Transactions and Concurrency Control 38
  2.7 Schema Evolution 40
  2.8 Theory 42
  2.9 Reference 44

3 ODS Data Model: An Informal View 52
  3.1 Preamble 52
7.2 BDMS Architecture
7.3 Data Dictionary
7.4 Structured Query Language (SQL)
  7.4.1 Embedded SQL Statement
7.5 NODAL Stored procedures
7.6 Database triggers
  7.6.1 Large objects (LOBs)
  7.6.2 Unstructured Data
  7.6.3 LOB Data type Helps Support Internet Applications
7.7 Object Oriented Programming (OOP)
7.8 3rd Generation Languages
7.9 Starting Oracle WebDB Application
7.10 Queries execution on the Bibliographical Database
7.11 Class Creation
7.12 Reference:
8 Web enables Application and specification of the developed BDS
  8.1 Preamble
    8.1.1 Query Interface
    8.1.2 Transmit Query Results
  8.2 NODAL grammar propose during my study
  8.3 Reference
9 Contribution of the work
  9.1 Preamble
  9.2 Direction of Futures Research
