ACKNOWLEDGEMENT

I consider myself extremely fortunate to have Dr. L.D. Vaikunthe, Reader, Post-graduate Department of Studies in Economics, Karnataka University, Dharwad as my research guide for the Ph.D. degree. I completed my thesis under the able guidance of such an eminent economist. Dr. Vaikunthe has all along been a source of inspiration to carry out my research. I thank him profusely for his illuminating discussions, critical comments and creative suggestions.

I am glad to express my gratitude to Dr. G.R. Patil, Chairman and Professor, Post-graduate Department of Studies in Economics, Karnataka University, Dharwad and Dr. S.R. Narappanavar, Professor, Post-graduate Department of Studies in Economics, Karnataka University, Dharwad for encouraging me to carry out my research undertaking. In this context, I extend my sincere thanks to the other members of the teaching and non-teaching staff of the Post-graduate Department of Studies in Economics for their unstinted co-operation.

My special thanks are due to Prof. Y.L. Inamdar, Reader (Retd.), Post-graduate Department of Studies in Economics, Karnataka University, Dharwad for his constructive comments on the conceptual framework of the thesis.

It is my pleasant duty to express my deep sense of gratitude to the personnel of the Drought Monitoring Cell, Bangalore, particularly Dr. G.S. Srinivasa Reddy for providing me with all the available data on drought and drought-prone areas in Karnataka and
useful discussions. My thanks are also due to the staff of the Department of Planning, Institutional Finance and Statistics and Science and Technology and Directorate of Economics and Statistics, Government of Karnataka, Bangalore for their willing co-operation by placing all their publications at my disposal for my research study. I also thank the Commissioner and Director of Sericulture, Department of Sericulture, Government of Karnataka, for furnishing me with the much needed data on sericulture in Karnataka.

The Deputy Directors of Sericulture at the districts of Dharwad, Raichur, Gulbarga, Bellary and Bijapur helped me in locating and identifying sericulturists/farmers and discussing technical details of sericulture. I am deeply indebted to them. I cannot adequately and individually thank the innumerable sericulturists who readily responded to my interviews. Without their willing help and co-operation the present research could not be completed.

I earnestly thank Mr.Girish Kulkarni for his skillful, excellent and neat typing of the thesis. Last but not the least, I thank my revered and beloved father, Prof. S.G.Gambhir, Reader (Retd.), Postgraduate Department of Studies in Economics, Karnataka University, Dharwad for his delightful comments and enlivening suggestions offered at all the stages of the thesis.

Dharwad

Sudheendra S. Gambheer
