ACKNOWLEDGEMENTS

I have great pleasure in expressing sincere gratitude to my guide Dr (Mrs.) Kusuma Neelakantan, Professor and Chairperson, Department of Marine Biology, Karnataka University P.G. Centre, Karwar for her supervision, guidance during the present study tenure.

I sincerely thank Dr. Anil A.C. Scientist, MCMR Division, National Institute of Oceanography (N.I.O.), Goa for his valuable suggestions and encouragements during the study period.

My sincere gratitude due to Dr. Ulhas G. Naik, Lecturer, Department of Marine Biology, Karnataka University PG Centre, Karwar for introducing me to this subject, guiding my research, coordinating my approach. He has encouraged me throughout the study tenure through his valuable suggestions, unstinted help, advice and encouragements.

My sincere thanks to Dr. V.G.Bhat, Professor and Administrator of the Karnataka University PG Centre Karwar for helping me with his valuable suggestions and encouragements during the study period.

I thank Dr. V.N.Nayak, Professor, Dept. of Marine Biology for his encouragements and suggestions which helped me during the course of study.
I thank Sri Sunildutt S. Gaonkar, the President of Shivaji Education Society, Ulaga for permitting me to register for Ph.D. programme and because of his encouragements I could complete my research work in time.

My thanks are also due to the Officer of the Department of Collegiate Education of Karnataka for permitting me to register and work for my Doctoral study.

My special thanks are due to Smt. Dr. Maya S. Gaonkar, Principal, Mahasatee Arts, Commerce and Science College, Ulga for her constant help and to my dear colleagues for their ever helping nature made me to complete my research work in a stipulated time. I also thank to our College Librarian for providing me the relevant reference books and journals.

I wish to thank with gratitude to Professor Sri V.B. Mallikesi, Department of Commerce, Sri Mahasatee Arts, Commerce and Science College, Ulga for his encouragements, constructive suggestions that helped me to complete my thesis work in targeted time.

I thank Dr. J.L. Rathod, Sr. Lecturer, Department of Marine Biology, Karnataka University P.G. Centre, Karwar for his help and suggestions during the study period. I also thank to Sri Chandrakant T. Harikantra, the Librarian of Karnataka University PG Centre, Karwar for providing me the relevant reference books and journals in time during the study period.
At this juncture, I heartily remember my beloved father late Vaikunt D. Nayak and loving mother late Smt. Sumitra V. Nayak for their sacrifice, pain taken in educating me, and this whole work I dedicates to them and I remain grateful to them for ever. In addition to this, I am grateful to my brother Sri Gopalkrishna and sister-in-law Sou. Shweta and sisters Sou. Sujata and late Shakuntala, whose best wishes and support made me to continue my higher studies and to reach the goal.

My heartfelt thanks are due to my wife Sou. Swati and my son Vihar and daughter Vaishnavi for their constant encouragements throughout the study period which made me to complete this research work successfully.

I heartily thank Mr. Naveen T. Kharvi for his meticulous typesetting, scanning and printing the text to greater satisfaction.

I also thank the authorities of Karnataka University, Dharwad for allowing me to register and submit my Doctoral Thesis.
