List of Tables

Table 2.1: Percent distribution of population by age and sex................................. 67
Table 2.2: Percent distribution of population by educational level, classified by sex
and age.................................................................................................................... 72
Table 2.3: Percent distribution of population by occupation, classified by sex and age.... 76
Table 2.4: Percent distribution of population by marital status, classified by sex and age... 79
Table 2.5: Percent distribution of households and population by caste....................... 82
Table 2.6: Percent distribution of households by family deity and caste..................... 87
Table 2.7: Percent distribution of households by their type and size by caste.............. 97
Table 2.8: Percent distribution of households by whether native of the village,
particulars of village from which migrated and caste.......................................... 100
Table 2.9: Percent distribution of households by their primary occupation and caste
....................................................................................................................................... 101
Table 2.10: Percent distribution of households by agricultural land owned and caste
....................................................................................................................................... 105
Table 2.11: Type of crops grown by those households engaged in the cultivation.... 107
Table 2.12: Proportion of households owning animals and poultry by caste............. 109
Table 2.13: Percent distribution of households by type of house, basic amenities
available by caste...................................................................................................... 110
Table 2.14: Proportion of households possessed some materials by caste.............. 113

Table 3.1: Percent distribution of women by caste.................................................. 117
Table 3.2: Percent distribution of women by age, education, occupation, marital status
and caste.................................................................................................................. 123
Table 3.3: Percent distribution of women by their husbands' age, education,
occupation and caste.............................................................................................. 127
Table 3.4: Percent distribution of women by type of household, Primary & secondary
source of income and Annual income of their households by caste....................... 130
Table 3.5: Percent distribution of women by age at menarche, age at marriage, types
of marriage, extent of remarriage by caste......................................................... 135
Table 3.6: Percent distribution of women by number of living children and proportion
of women who have experienced child loss and foetal loss, by caste.................... 141
Table 3.7: Proportion of women who have used different family planning methods by
caste and age.......................................................................................................... 146
Table 3.8: Frequency of food consumption as reported by women........................... 150
Table 3.9: Proportion of women consuming food items at least weekly and proportion
of women drinking tea more than 3 times daily, classified by their caste,
education and occupation.................................................................................... 154
Table 3.10: Percent distribution of women by their Nutritional status..................... 157
Table 3.11: Percent distribution of women by prevalence of obesity and background
characteristics of women....................................................................................... 159
Table 3.12: Percent distribution of women by their anaemia level........................... 162
Table 3.13: Percent distribution of women by their level of anaemia classified by
caste, age, education, occupation and marital status......................................... 163
Table 3.14: Proportion of women who have been suffering from health problems.. 167
Table 3.15: Proportion of women who have been suffering from various health problems, classified by their caste, age, education, occupation and marital status

Table 4.1: Percent distribution of women in different phases of menopause by age

Table 4.2: Percent distribution of women by their perception on 'how long a woman has to wait to confirm that she has attained menopause after FMP', by background characteristics

Table 4.3: Percent distribution of postmenopausal women by duration they have waited after FMP to confirm their menopause by background characteristics

Table 4.4: Proportion of postmenopausal women reported irregular menstruation, by their background characteristics

Table 4.5: Proportion of premenopausal women reported to be experiencing irregular menstruation by their caste

Table 4.6: Percent distribution of postmenopausal women by duration they have experienced irregular menstruation, classified by their background characteristics

Table 4.7: Percent distribution of perimenopausal women by duration since they have been experiencing irregular menstruation, classified by their background characteristics

Table 5.1: Proportion of women in postmenopause by age

Table 5.2: Percent distribution of women by age at natural menopause

Table 5.3: Mean and median age at natural menopause (Normal and life-table analysis)

Table 5.4: Mean (life-table) age at menopause by socio-economic characteristics

Table 5.5: Mean (life-table) age at menopause by reproductive health related factors

Table 5.6: Mean (life-table) age at menopause by food and health related factors

Table 6.1: Percent distribution of women by interval between two menstrual cycles as experienced by them during menopausal transition by their background characteristics

Table 6.2: Percent distribution of women by flow of bleeding as experienced by them during their menopausal transition by background characteristics

Table 6.3: Proportion of women reported their menstrual periods became painful during menopausal transition by background characteristics

Table 6.4: Proportion of women experienced vasomotor symptoms by their menopausal state

Table 6.5: Proportion of women experienced hot flashes/night sweats by their background characteristics

Table 6.6: Proportion of women experienced sleeplessness by their background characteristics

Table 6.7: Proportion of women experienced urogenital symptoms by their menopausal state

Table 6.8: Proportion of women experienced urinary symptoms by their background characteristics

Table 6.9: Proportion of women experienced vaginal symptoms by their background characteristics
