Chapter - I
INTRODUCTION 1

Chapter - II
REVIEW OF LITERATURE 7
2.1. Habit and habitat 7
2.2. Vernacular names 7
2.3. Experimental plants 8
2.3.1. Aristolochia indica Linn. 8
2.3.2. Aristolochia saccata Wall. 8
2.3.3. Aristolochia cathcartii Hk. f. & T. 9
2.3.4. Aristolochia tagala Cham. 10
2.4. Karyotypic analysis 10
2.5. In-vitro propagation 15
2.5.1. Propagation from axillary buds and shoots 17
2.5.2. Multiple shoots from seeds 18
2.5.3. Propagation by adventitious shoot organogenesis 19
2.5.4. Regeneration from roots 21
2.5.5. Factors affecting in-vitro shoot regeneration and growth of plants 22
2.5.5.1. Explant type 22
2.5.5.2. Plant growth regulators 23
2.5.5.3. pH of the culture medium 23
2.5.5.4. Basal media 24
2.5.5.5. Rooting of in-vitro regenerated shoots 25
2.6. ISSR marker based phylogenetic analyses 26
Chapter III
MATERIALS AND METHODS
3.1. Collection of plants 34
3.2. Karyomorphological analysis 35
3.2.1. Collection of root tips 35
3.2.2. Preparation of slides 35
3.2.2.1. Hydrolysis and staining of chromosomes 35
3.2.2.2. Squash preparation 35
3.3. In vitro propagation 37
3.3.1. Explant preparations and surface sterilization 38
3.3.2. Establishment of cultures 38
3.3.2.1. Basal media 38
3.3.2.2. Preparation of stock solution 38
3.3.2.3. Growth regulators 40
3.3.2.3.1. Auxins 40
3.3.2.3.2. Cytokinins 40
3.3.2.4. Preparation of working media 40
3.3.2.5. Sterilization 41
3.3.2.6. Inoculation and incubation 41
3.3.2.7. Induction of callus and regeneration of plantlets 42
3.3.2.8. In vitro rooting 42
3.3.2.9. Hardening and acclimatization 43
3.3.2.10. Data collection and statistical analysis 43
3.4. ISSR marker based phylogenetic analysis 43
3.4.1. DNA extraction 43
3.4.2. DNA quantification 44
3.4.3. PCR amplification for ISSR analysis 44
3.4.4. PCR reaction mix 44
3.4.5. PCR reaction condition 46
3.4.6. Data analysis for genetic diversity 46

Chapter – IV
RESULTS 47
4.1. Chromosome characterization 47
4.1.1. Karyomorphology of A. indicia Linn. 47
4.1.2. Karyomorphology of A. saccata Wall. 49
4.1.3. Karyomorphology of A. cathcartii Hook.f. 52
4.1.4. Karyomorphology of A. tagala Cham. 55
4.2. In-vitro propagation of Aristolochia 58
4.2.1. Induction of callus and regeneration of plantlets 58
4.2.2. Direct somatic embryogenesis from nodal explants 67
4.2.3. Root induction 72
4.2.4. Acclimatization and hardening 73
4.3. ISSR based phylogenetic analysis 75

Chapter - V
DISCUSSION 80
5.1. Karyotypic analyses 81
5.2. In-vitro propagation 83
5.3. ISSR marker based phylogenetic analyses 86

Chapter - VI
SUMMARY AND CONCLUSION 88
6.1. Summary 88
6.2. Conclusion 90
