ACKNOWLEDGEMENTS

The endless thanks go to Lord Almighty for all the blessings he has showered onto me, which has enabled me to write this last note in my research work. During the period of my research, as in the rest of my life, I have been blessed by Almighty with some extraordinary people who have spun a web of support around me. Words can never be enough in expressing how grateful I am to those incredible people in my life that made this thesis possible.

It is my privilege to work under the astute guidance of Dr Preet Mohinder Singh Bedi, Associate Professor, Department of Pharmaceutical Sciences, Guru Nanak Dev University, Amritsar, whose invaluable suggestions and kind cooperation has significantly improved the quality of this work. I thank him for all the inspiration, kindness and support he has given to me throughout his endeavor.

My vocabulary fails to locate adequate words to express profound indebtedness to my co-supervisor Dr Balwinder Singh Sooch, Assistant Professor, Department of Biotechnology, Punjabi University, Patiala, for his kind assistance and highly constructive comments. I consider myself exceptionally fortunate for being bestowed with the guidance of a teacher of such a dynamic vision.

I express my sincere thanks to Dr Subheet Jain, Head, Department of Pharmaceutical Sciences, Guru Nanak Dev University, Amritsar, for providing me the necessary facilities for carrying out my research work.

I highly appreciate the genuine support of my colleagues especially Dr. M.P.S. Ishar, Mrs. Rajbir Bhatti, Dr. Balbir Singh, Mrs. Sarbjit Kaur and Mr. Amrit Pal Singh. I greatly acknowledge the help rendered by Dr. Kunal Nepali, Mr. Gurbir Singh and Mrs. Ritu Ojha.

I am extremely grateful to Patent Information Centre, Punjab State Council for Science and Technology, Chandigarh, for providing the patent search facilities. I would like to address special thanks to the unknown reviewers of my thesis, for accepting to read and review this thesis. I wish to thank the authors, developers and maintainers of the open source used in this work. I would like to thank all the researchers whose works I have used.

I take this opportunity to dedicate this work to my parents who have made me what I am. My parents have passed onto me a wonderful humanitarian lineage, whose values
cannot be measured by any worldly yardsticks. I also express my deep sense of gratitude to the affection and support shown to me by my parents-in-law, Mr. R.C. Sharma and Mrs. Darshan Sharma.

The warmest of my thanks to my husband for his understanding and patience while I was occupied in this work. He has supported me in each and every way, believed in me permanently and inspired me in all dimensions of my life. I am blessed with two wonderful kids, Hamayal and Jayant, who knew only to encourage and never did complain about anything even when they had to suffer in my absence over these years. I owe everything to them, without their everlasting love this thesis would never be completed.

I am deeply indebted to my sisters, Meena and Rajni, and brother, Varinder for their constant encouragement. They have very kindly sent their message for goodwill in spite of their heavy responsibilities and commitments for which I am very grateful to them.

My heartiest thanks are due to Mr Narinder Sharma, Mrs Raju, Pawan, Rachna, Dr Sumanjit Kaur, Priyanka, and Shelly for the care, affection and support provided at the hour when it was needed the most. I am highly thankful to Giani Hardeep Singh Ji for his encouragement as I moved through this venture.

I read somewhere that every individual in this world is acquainted to every other person on this planet through not more than seven intermediaries. Through my acquaintances, I extend my thanks to their extended seven links and endeavour to encompass whole humanity. I sincerely wish this work is of some use to humanity at large.

Neena Bedi
