A Word of Gratitude ...

At last, a long-standing dream of me to do fruitful research and equip academically to cater for the present day needs of the student community is coming true. The moment makes me deeply moved to express my heartfelt gratitude towards all those who have directly or indirectly supported me to realize my dream.

Words fail to acknowledge my extreme sense of gratitude towards my research guide, Dr. N. M. Badiger, Reader, Department of Physics, Karnatak University, Dharwad, for his inspiring guidance to explore new ideas. His constant encouragement and thought-provoking discussions were a great deal for timely completion of my research. I was fortunate enough to come across him as guide. His dedication to research is inspiring. Above all, he was very humane to all the academic and non-academic difficulties I faced during my research.

I am extremely thankful to Prof. S.S. Kubakaddi, Chairman, Department of Physics, Karnatak University Dharwad, for his encouraging words and timely help in accomplishing official formalities despite his administrative and teaching engagements.

I would fail in duty, if I do not express my gratitude towards retired professors of nuclear section Prof. N. Umakantha and Prof. S.R. Thondadarya for their invaluable suggestions and helpful discussions throughout my research. Their dedication to the cause of Physics is exemplary.

My special thanks are due to Prof. B. Hanumaiah (former Vice Chancellor, Mangalore University, Mangalore), Director, University Science Instruments Centre (USIC) K.U. Dharwad, for his kind concern and help. His role in providing me instrumental facility to carry out my experiments in USIC was immense.

I render my sincere thanks to former chairmen, Prof. B. G. Mulimani, and Prof. A.M. Karaguppiyar for being kind in providing the necessary facilities when I joined this department for research.
I am extremely grateful to all the teaching and non-teaching staff members of the Physics Department, Karnataka University, Dharwad, for having treated me as a member of Physics-family in the department.

It is my sincere duty to thank the former two directors of USIC and all technical and non-technical staff in USIC for helping me to coordinate the collection of the research data. In particular, my thanks are due to Shri Sayed Azemuddin and Shri. S.V. Myagoti who were rushing to help in the needy hours of my experiments.

I owe a lot to my Father, Late Shri Vaikunth M. Nayak, and Mother, Smt. Padmanavathi V. Nayak whose strong faith in education, laid the foundation of my academic pursuit right from my childhood. If not more, I offer them my sincere and heartfelt thanks for their vision of life at this juncture.

How do I forget the love, inspiration and unfailing cooperation of my wife Smt. Shubhada Suresh throughout my research work? But for her encouragement this venture would not have taken off. Nevertheless, inspiration and affection by my loving children Chi. Raghunandan and Chi. Chandramohan are also gratefully remembered here.

The moment makes me extremely happy to remember all my loving sisters, Smt. Smitha, Smt. Chitra, Smt. Jayashree and Smt. Sudha and brother, Shri Sanjay and their spouses and children for the affection and inspiration they have accorded on me throughout my research work. I wish Smt. Sudha an early completion of her Ph.D work. I am reminded of the help and encouragement rendered to me by Smt. Asha & Shri Janardhan M. Bhat, Shri Anand K. Kini and all the other relatives at this moment. My sincere thanks to all of them.

I gratefully acknowledge here the constant encouragement and timely help I received from the present Principal Shri Siddaramu, Government Arts and Science College, Karwar, and also from former principals Shri A. F. Shaikh, Shri A. G. Gaonkar and Smt. P. M. Patil. This occasion reminds me golden days of my career in the college as teacher of Physics in the company of seniors like Shri V. R. Kulkarni and Shri H. H. Nayak, Shri R. S. Sukthankar and Shri. K. C. Hebbar. I owe my sincere thanks to all my
past and present worthy colleagues in Government Arts and Science College, Karwar, for their well wishes and encouragement. I am deeply indebted to all of them for their keen interest in my research work. My special thanks are due to Shri R. R. Diwanji, Shri B. G. Hegde and Shri Raghav Naik for having shared the academic and NCC work during my deputation to Karnataka University. It is my pleasure to place on record my sincere thanks to all of my non-teaching colleagues, especially in the college-office for their help in quick disposal of official formalities. I also take this opportunity to express my heartfelt thanks to the incredible student community of Government Arts and Science College, Karwar, who always stand an inspiration to me.

I could not have completed this task but for the selection and deputation to the Physics Department, K.V. Dharwad as Teacher Fellow under UGC-FIP scheme of Xth five-year plan by the Department of Collegiate Education, Government of Karnataka and South-Western UGC regional office, Bangalore. My special thanks are due to Prof. Kodandaramaiah, Director, Department of Collegiate Education, Bangalore, and Dr. (Smt.) Manju Singh, Deputy Secretary & Regional Head, South-Western UGC Regional Office for this favour. I owe sincere thanks to all the persons in these offices responsible for my deputation to Karnataka University for completion of research. Moreover, the timely discharge of the office by Vice-Chancellor, Registrar, Director of College Development Council (CDC), and also by Ph.D. section of the Karnataka University were a great deal of help to me throughout this venture. The Naval NCC office & KAR, Naval Unit NCC, Karwar, has timely arranged to grant me supernumerary placement for the period of my research. I would ever remember the present and former Commanding officers and the office staff for this immense help.

My stay at Dharwad during FIP was interactive and enjoyable because of other research scholars. Words are not enough to express my feelings towards Shri R. V. Pujer, Shri Praveen Shidling, Shri Arvind Bennal, Shri Devaraj Talakallu, Miss Savita Hosur and other research scholars from different sections in the Physics Department, Karnataka University, Dharwad, for their encouragement and help.
Lastly, I wish to thank all those friends and well-wishers who have helped me directly or indirectly in my career as a student, a teacher and a researcher in Physics.

Thanks to thou all!
