ACKNOWLEDGEMENT

The words at my command are not adequate in spirit to convey the depth of my feelings of gratitude to my research supervisor Dr. G. S. Gadaginamath M.Sc., Ph.D., LL.B (Spl.), C. Chem., MRSC (London), Professor of Organic Chemistry (Retd.), Karnataka University, Dharwad, the real architect of my research career, for his keen interest, dedicated guidance, constant encouragement and stimulating discussions throughout the course of investigation leading to the preparation of this thesis. I am grateful to him for introducing me to the art of synthetic Organic Chemistry.

I sincerely thank Prof. V. B. Mahale, Chairman, P. G. Department of studies in Chemistry, Karnataka University, Dharwad for providing the necessary facilities to carry out this investigation.

I would like to place on record my special thanks to my teachers Prof. M. L. Budni, Prof. L. D. Basanagoudar, Prof. C. D. Daulatabad, Prof. B. V. Badami, Prof. S.T. Nandibewoor, Dr. M. V. Kulkarni, Dr. K. M. Hosamani and Dr. I. M. Khazi for their affection and encouragement.

I take this opportunity to express my thanks to Ms. Veena B. Megadi, Department of Biochemistry for helping me to evaluate the newly synthesised compounds for their antibacterial and antifungal activities.

I express my special and heartful thanks to my labmates, Dr. S. R. Pujar, R. S. Gani and D. S. Donawade for their affection, cooperation and friendliness throughout the days which I have spent with them.

I am happy to thank all my research colleagues, who worked with me at various stages of this course, for maintaining a pleasant environment and
timely help rendered by them. I am grateful to Dr. R. M. Kulkarni, 
Dr. M. B. Melawanki, Dr. B. G. Gowda, Dr. U. S. Toti, Dr. Mahaveer 
Kurkuri, Dr. G. M. Neelgund, Dr. Raju Raddar, Dr. Shivayogi Neelgund, R. A. 
Kusnur, H. S. Ramesh, P. R. Latte, P. S. Shinge, R. K. Hunur, A. S. Patil, 
S. A. Patil, R. S. Koti, V. A. Sungar, R. S. Baligar, R. M. Mulla, Guru 
Hiremath, B. P. Kamat, R. S. Vadavi and Gundurao Kolavi whose timely 
assistance at this crucial juncture in my career will always remain fresh in 
my memory.

I whole heartedly thank my friends Jagadish B. S, Shreedhar 
Revankar, Santosh Kanade, Ganesh Alawandi, Vinayak Hegde, Harsha Hegde 
and Sirsi Neharu Nagar friends circle who shared many moments of joy and 
agony in my life.

It is the love embedded with faith and hope of my parents, 
relatives, brother Raju and sisters Usha and Asha which keeps me going and 
words would fail to express my feelings of indebtedness to them. Also, I thank 
Mrs. S. G. Gadaginamath for kind encouragement.

Acknowledgements are also due to SIF, IISc., Bangalore, RSIC 
Chandigarh, CDRI Lucknow, IIT, Chennai, IICT Hyderabad and USIC, 
Karnatak University for providing spectral and analytical data. Also, I thank 
nonteaching staff of the Department of Chemistry, Karnataka University, 
Dharwad for their kind co-operation. I thank Mruthyunjaya S. M., Numeric 
Computers, Saptapur, Dharwad for their meticulous typing and DTP work.

Last but not the least, I pay my floral tributes to late Gurumurthi 
for his affection, concern and moral support.

Dharwad 
August 2003

Manjunath G. Bhovi
