Chapter-I
I Introduction 1
  I.1 Membrane Transport Properties and their Requirements 2
  I.2 Molecular Transport Phenomena in Polymer Applications 3
    I.2.1 Barrier Coating 5
    I.2.2 Food Packaging 7
    I.2.3 Separation Science 9
    I.2.4 Chemical Coatings and Biosensors 10
    I.2.5 Controlled Release of Drugs 13
  I.3 Experimental Methods for Transport phenomena Study 15
  I.4 Literature Review 17
  I.5 Goal of the Thesis 24
  I.6 References 25

Chapter-II
II Materials and Experimental Techniques 34
  II.1 Properties and Applications of Liquids 34
    II.1.1 Alkanes 35
    II.1.2 Chloroalkanes and chloroalkenes 35
    II.1.3 Esters and Aldehydes 37
    II.1.4 Aromatics 39
    II.1.5 Ketones and Nitriles 40
  II.2 Polymer Membranes 46
    II.2.1 Background 47
  II.3 Properties of Fluoroelastomers 51
    II.3.1 Hardness 52
    II.3.2 Stress and Strain 52
    II.3.3 Compression Set Resistance 52
    II.3.4 Heat Resistance 52
    II.3.5 Fluid Resistance 53
    II.3.6 Low Temperature Properties 53
  II.4 Testing Methods and Applications of Fluoroelastomers 53
    II.4.1 Compression Stress Relaxation (CSR) Testing 54
    II.4.2 Fuel Permeation Testing 55
    II.4.3 Aerospace 56
    II.4.4 Aerospace - Greases and Lubricants 56
    II.4.5 Pharmaceutical Industry 57
    II.4.6 Building and Architecture-Chimney Lining 58
    II.4.7 Other Applications - Packaging and Printing 58

Chapter-III
III Sorption, Diffusion and Permeation of Esters, Aldehydes, Ketone and Aromatic Liquids into Tetrafluoroethylene/propylene Copolymer Membrane
III.1 Abstract
III.2 Introduction
III.3 Experimental
  III.3.1 Reagents/chemicals
  III.3.2 Materials
  III.3.3 Sorption Gravimetric Experiments
III.4 Results and Discussion
  III.4.1 Sorption Kinetics
  III.4.2 Diffusion and Permeation Coefficients
  III.4.3 Concentration Profiles
  III.4.4 Transport Mechanism
  III.4.5 Temperature Effect
III.5 Conclusions
III.6 References

Chapter-IV
IV Molecular Transport of Esters, Aldehydes, Aromatic Liquids and a Ketone into Fluoroelastomer Membrane
IV.1 Abstract
IV.2 Introduction
IV.3 Experimental
  IV.3.1 Reagents/chemicals
  IV.3.2 Materials
  IV.3.3 Sorption Gravimetric Experiments
IV.4 Results and Discussion
  IV.4.1 Sorption Kinetics
  IV.4.2 Diffusion and Permeation Coefficients
  IV.4.3 Concentration Profiles
  IV.4.4 Transport Mechanism
  IV.4.5 Temperature Effect
IV.5 Conclusions
IV.6 References

Chapter-V
V Molecular Migration of Aromatic Liquids into a Commercial Fluoroelastomeric Membrane
V.1 Abstract
V.2 Introduction
V.3 Experimental
CHAPTER-VIII
VIII Studies on Molecular Transport of n-Alkanes through Poly(tetra-fluoroethylene-co-propylene) Elastomeric Membrane
VIII.1 Abstract 193
VIII.2 Introduction 194
VIII.3 Experimental 195
VIII.3.1 Reagents/chemicals 195
VIII.3.2 Materials 196
VIII.3.3 Sorption Gravimetric Experiments 196
VIII.4 Results and discussion 197
VIII.4.1 Sorption Kinetics 197
VIII.4.2 Diffusion and Permeation Coefficients 200
VIII.4.3 Concentration Profiles 202
VIII.4.4 Transport Mechanism 207
VIII.4.5 Activation Parameters 209
VIII.5 Conclusions 212
VIII.6 References 213
