# LIST OF ALGORITHMS

Algorithm 1: Modified Memetic Search Phase motivated by Golden Section Search ..........................................................38
Algorithm 2: Randomized Memetic ABC Algorithm ............................................39
Algorithm 3: Improved Onlooker Bee Phase in Artificial Bee Colony Algorithm ........................................................................47
Algorithm 4: Enhanced Local Search in ABC algorithm ..................................55
Algorithm 5: Improved Employed Bee phase and Onlooker Bee phase in ABC algorithm ........................................................................60
Algorithm 6: New Local Search Strategy in ABC algorithm ............................67
Algorithm 7: Solution Update in Employed Bee Phase .................................72
Algorithm 8: Golden Section Search (GSS) Strategy ......................................78
Algorithm 9: Memetic Search in ABC with Fitness based position update .......79
Algorithm 10: Levy Flight based Memetic Search phase .................................84
Algorithm 11: Levy Flight based memetic search in ABC algorithm ..............85
Algorithm 12: Memetic Search in Differential Evolution (MSDE) Algorithm .........................................................................................93
Algorithm 13: Opposition Based Optimization Method ...................................106
Algorithm 14: Modified Position Update in Spider Monkey Optimization (SMO) Algorithm: .................................................................116
Algorithm 15: Fitness based Position Update in Spider Monkey Optimization (FPSMO) Algorithm: .................................................................120
