

# Contents:

## **PART-A: INTRODUCTION OF CHROMATOGRAPHY**

### **Chapter-1: An introduction of chromatography and related technology**

1.1 History	1
1.2. Introduction	1
1.3. Types of chromatography	2
1.4. High performance liquid chromatography	10
1.5. Ultra performance liquid chromatography	14
1.6. Application of chromatography	18
1.7. Method development	25
1.8. Method validation	26
2. References	35

## **PART-B: METHODS FOR QUANTITATIVE ANALYSIS OF DRONEDARONE**

### **Chapter-2: Assay method validation and degradation study of dronedarone by HPLC**

1. Introduction	39
2. Literature Review	40
3. Aim of present work	41
4. Method development	41
5. Analytical method validation	42
6. Conclusion	93
7. Reference	94

### **Chapter-3: Rapid stability indicating assay method validation and degradation study of dronedarone by UPLC**

1. Aim of present work	96
2. Method development	96
3. Analytical method validation	98
4. Conclusion	153

## **Chapter-4: HPTLC method for quantification of dronedarone**

1. Introduction of HPTLC	154
2. Method development and optimization	156
3. Instrumentation	158
4. Method validation	160
5. Reference	169

## **PART-C: HPLC METHOD DEVELOPMENT AND VALIDATION**

### **Chapter-5: RP-HPLC method development, validation and degradation study of rifaximin.**

1. Introduction	170
2. Literature Review	172
3. Aim of present work	174
4. Method development	175
5. Method validation	176
6. Conclusion	209
7. Reference	210

## **PART-D: UPLC METHOD DEVELOPMENT AND VALIDATION**

### **Chapter-6: Rapid stability indicating UPLC method for quantification of terazosin**

1. Introduction	212
2. Literature Review	213
3. Aim of present work	216
4. Method development	217
5. Analytical method validation	217
6. Conclusion	246
7. Reference	247

## **Chapter-7: Buffer free UPLC method validation and degradation study of milnacipran.**

1. Introduction	249
2. Literature Review	249
3. Aim of present work	255
4. Method development	255
5. Analytical method validation	256
6. Conclusion	289
7. Reference	290

## **Chapter-8: Method validation, base degradation study and impurity characterization of famotidine.**

1. Introduction	293
2. Literature Review	294
3. Aim of present work	298
4. Method development	298
5. Method validation	299
6. Reference	346

## **Research Publications**
