ACKNOWLEDGEMENTS

I am extremely happy to express my sincere thanks and appreciation to Professor H. Surya Prakash Rao, Department of Chemistry, Pondicherry University for inducting me into the realm of innovative and interesting field of Synthesis and Stereochemistry. I also express my deep sense of gratitude to him for his guidance, continuous and moral support, constructive criticisms and constant encouragements throughout the course of this investigation.

I record my deep sense of gratitude and I continue to remain obliged to Professor J. Subramanian, Head, Department of Chemistry, Pondicherry University, who generously provided the required facilities and showed his kindness and good wishes in executing this work and also providing valuable suggestions as Doctoral Committee member. My sincere thanks to Professor A. G. Ramachandran Nair, Retired Professor, Formerly Head of the Department of Chemistry, Pondicherry University for his valuable suggestions and encouragement during the course of study.

I thank Professor A. Srikrishna, Department of Organic Chemistry, Indian Institute of Science, Bangalore and Professor R. Raghunathan, Department of Chemistry, University of Madras, Chennai for their help in recording the spectral data and fruitful discussions during the course of my research work.

My deepest thanks to Dr. Prakash P. Wadagaonkar, Scientist, Polymer Chemistry Division, National Chemical Laboratory (NCL), Pune for his incalculable help regarding literature to my work.

I am also thankful to Professor P. Sambasiva Rao, Dr. Bidhu Busan Das, Dr. T. M. Rajendiran, Dr. R. Venkatesan, Dr. G. Narahari Sastry, Dr. Bala. Manimaran, Dr. G. Vasugi, Faculty members, Department of Chemistry, Pondicherry University for their help and friendly cooperation.

I express my gratitude to Dr. N. Parthasarathy, Reader, School of Ecology, Pondicherry University for his encouragement and friendly cooperation. I also thank
Professor V. Devarajan, Raman School of Physics, Pondicherry University for his constructive suggestions as Doctoral Committee member.

I express my profound thanks to my teachers, Professor M. Krishna Pillai, Professor M. Palaniandavar, Professor R. Jeyaraman, Professor P. Venuvanalingam, Professor K. Panchanatheswaran, Dr. R. Renganathan, Dr. S. Arunachalam and Dr. M. Nallu, Department of Chemistry, Bharathidasan University, Trichirappalli for their inspiration during the tenure of my study.

It is my great pleasure to appreciate my colleagues Dr. K. Jeyalakshmi, Mr. S. Rajamathe, Mr. S. Jothilingam, Ms. E. Poonguzhali, Mr. S. Sivakumar, Ms. K. Vasantham, Mr. Shaik Rafi, Ms. K. Geetha, Ms. S. Umasankari for their unstinted cooperation and enthusiastic support during my course of study in Pondicherry.

I express my special thanks to Mr. A. Kuppusamy and all other M. Phil. and M. Sc., students who worked in Organic Chemistry Laboratory during the course of my study for their help and friendly cooperation.

My special thanks to Mr. M. Vijayaraj, Catalysis Division, NCL, Pune, Mr. K. Gopal, Department of Chemistry, IITK and Mr. J. Nithyanandhan, P. Babu, Department of Organic Chemistry, Indian Institute of Science, Bangalore for spending their valuable time in literature survey for me. I extend my thanks to Mr. V. Balamurugan, Department of Chemistry, IITK for getting ORTEP diagram for one of my crystals.

It is great pleasure to thank Mr. M. Poornachandran, Research Scholar, Department of Organic Chemistry, University of Madras, Chennai for his invaluable help during final and crucial stage of my research work.

I wish to place my sincere thanks to Dr. M. Kalyanasundaram, Deputy Director, Vector Control Research Centre (VCRC) and Dr. Nisha George, Technical Officer, VCRC, Pondicherry for recording UV spectra of some of the samples.
It is my great pleasure to thank Dr. M. S. Moni, Dr. M. Murugesan and other staffs of Regional Sophisticated Instrumentation Centre (RSIC), Indian Institute of Technology Madras, Chennai, Sophisticated Instruments Facility (SIF), Indian Institute of Science, Bangalore for providing me NMR, Mass spectral and analytical data.

I thank all the research scholars of Chemistry Department especially Mr. R. Kannappan, Ms. S. Tamijselvy, Mr. K. Velavan, Ms. I. Souganthi for their help and cooperation during my stay in Pondicherry.

My heartfelt thanks to Mr. S. Vivekanandhan, School of Physics, Pondicherry University for his judicious help in the thesis preparation. I also thank my dearest friends Dr. N. Ayyappan, Dr. S. Muthuramkumar, Mr. R. Venkateswaran, School of Ecology, Dr. P. Muralidharan, Mr. C. R. Mariappan, School of Physics, Mr. A. Gopalakannan, Mr. P. Saravanan, Mr. N. Ayyadurai, Department of Bio-Technology for their love and care.

My special thanks are due to Mr. R. Balaji, Department of Chemistry, Pondicherry University for his friendly cooperation and help during thesis preparation.

I thank all non-teaching staff members of Chemistry Department, Pondicherry University, Pondicherry for their help and friendly cooperation.

Finally, I thank University Grants Commission (UGC) as Junior Research Fellow (JRF) in Major Research Project (No. 12-6/97(SR-I) dt. 30-09-1997) and Council of Scientific and Industrial Research (CSIR), New Delhi for awarding CSIR-Senior Research Fellow (CSIR-SRF) are greatly acknowledged for granting fellowship for successful completion of the research work.

During the course of study, an innumerable friends and colleagues have helped me in various aspects of my work. Lack of space restricts me in not mentioning each and
every one of them individually, but that does not make their contributions any less. I am immensely grateful to all of them who helped me.

My sincere gratitude to my parents Thiru & Thirumathi Palanisamy, brother Mr. P. Suresh, sister Suji and family members for their constant encouragement and support, which enabled me to pursue my goal whole-heartedly. I owe my life to them for their commitment and patience.

(S. P. SENTHILKUMAR)
