Acknowledgements

It gives me great pleasure in expressing my gratitude to all those people who have supported me and had their contributions in making this thesis possible.

First and foremost, I must acknowledge and thank The Almighty Waheguru for blessing, protecting and guiding me throughout this period. I could never have accomplished this without the faith I have in the Almighty.

I express my profound sense of reverence to my supervisor Dr. Kamaljit Singh, Professor, Department of Chemistry, Guru Nanak Dev University, Amritsar for his constant guidance, support, motivation and untiring help during the course of my PhD. He has given me enough freedom during my research, and he has always been nice to me. I will always remember his supporting nature.

I am highly thankful to Head of the Department of Chemistry, Guru Nanak Dev University, Amritsar for providing necessary facilities for accomplishment of the research work.

I feel immense pleasure to express my sincere gratitude to Dr. Paramjit Kaur for providing invaluable guidance for analyte sensing work as well as moral support.

I am also grateful to my lab-mates, faculty and non-teaching staff of Department of Chemistry for their generous support and co-operation. This list is not complete unless I express my sincere thanks to my worthy senior Dr. Kawaljit Singh and his wife Gurminder Kaur for their valuable suggestions, timely help and immense support during research work.

I would like to thank my brothers Harpreet & Jasjit and sister Harveen for their support and encouragement with best wishes. I am also thankful to my best friends Harneet, Richi and Nayyer for their immense support and encouragement.

The biological activity testing described in this thesis would not have been obtained without a close collaboration with few laboratories. I owe a great deal of appreciation and gratitude to Professor Kelly Chibale, Department of Chemistry and Institute of Infectious Disease and Molecular Medicine, University of Cape Town, Rondebosch, South Africa for conducting Antiplasmodial as well as Antitubercular testings, and Professor Jan Balzarini, Rega institute for Medical Research, Katholieke University Leuven, Belgium for providing Antiviral and cytotoxicity data.

Finally, I bow my head to my parents for their generous support, positive attitude, invaluable blessings, and selfless but untold sacrifices for my better & bright career. They were always there when I needed them and without their encouragement and understanding it would have been impossible for me to finish this work.

Hardeep Kaur
