Acknowledgment

Department of Instrumentation & Control Engg. where knowledge is considered as wealth and it is proved that the powers of mind are like the rays of sun; when concentrated, they illume.

First and foremost, I express my gratitude towards my advisor, Prof. P. D. Shendge who kindly consented to act as my guide, and enabled me to complete the thesis. This work would not have seen light of the day without the active involvement of our control guru, Prof. S. B. Phadke. I cannot thank both of them enough; their patience, energy, and an almost contagious positive attitude are largely responsible for a timely and enjoyable completion of this assignment. Both of them have been a pillar of great strength, motivation and commitment.

I owe my sincere gratitude to Prof. S. L. Patil and Prof. C. Y. Patil, past and present HoD for helping me in pulling out of critical situations. Their contribution is really appreciated and at times they have gone out-of-the-way to just help me. I would also like to profoundly thank Prof. V. S. Bandal for his critical comments and advice during progress presentations. I appreciate his enlightening guidance; especially his pursuit for the perfect work will help me in the long run.

I also sincerely acknowledge the inspiration and co-operation from my co-researcher, Divyesh Ginoya and other students at Advanced Control Lab. who have directly or indirectly helped me in the course of my work.

I am also grateful to Department of Atomic Energy for the funding and technical support of this research. A word of special mention to Ashitosh, who has been rock-steady for the past 3 years and has helped me focus on the task at hand, by mitigating my burden in regular chores.
I acknowledge with utmost sincerity and humility, the imperative contribution of my parent institution MITAOE Alandi in the completion of this work. A word of special thanks to our Executive Director, Dr. Sunil Karad will not be out of place for the faith he put in me and for being such a steady source of inspiration. MITAOE has provided me with a amazing group of colleagues in Aniket, Kaliprasad, Amit, Shailesh, Sandip, Ashish, Smita, Kavita, who have directly or indirectly contributed in the completion of this work.

I am appreciative of my wife, Dipti and my life, Archit who have always been around when things looked bleak, and have been very supportive through the crests and troughs in all these years. A special thanks to my parents, without whose love and support, I probably would not have reached this far.

Last but certainly not least, I would like to thank all my teachers at various levels of my education, from whom I have gained more than just academic knowledge. They have positively influenced, and shaped my ideas and made me a better person.

Prasheel V. Suryawanshi
