## TABLES

1.1 Details of the libraries studied

1.2 Rate of response of questionnaires

3.1 Stages in the Super's Career Stage Model

4.1 Colleges affiliated to University of Kerala

4.2 Department libraries of University of Kerala

4.3 Colleges affiliated to University of Calicut

4.4 Department libraries of University of Calicut

4.5 Department/School libraries of CUSAT

4.6 Department/School libraries of M G University

4.7 Study centre libraries of M G University

4.8 Constituent colleges of Kerala Agricultural University

4.9 Year of establishment of university libraries

4.10 Average number of working days of university libraries

4.11 Opening hours of university libraries

4.12 Documentary resources of university libraries

4.13 Number of newspapers and periodicals in the libraries

4.14 Membership of university libraries

4.15 Equipment in university libraries

4.16 Annual budget of university libraries

4.17 Services rendered by university libraries

4.18 Average expenditure per employee

4.19 Services rendered by university libraries

5.1 Quantum of work in the Acquisition Section

5.2 Average annual addition of documents

5.3 Average annual work in the Technical Section

5.4 Quantum of annual output in the Maintenance Section

5.5 Annual volume of work in the Circulation Section
5.6 Workload in Periodicals Section
5.7 Strength of the reference collection
5.8 Annual volume of work in the Reference Section
5.9 Annual workload in Documentation Section
5.10 Annual workload in Information Technology Section
5.11 Routines and quantum of work of other sections
5.12 Staff pattern in the universities of Kerala
5.13 Designation and scales of pay of professional staff
5.14 Manpower in the Acquisition Section
5.15 Manpower in the Technical Section
5.16 Manpower in the Maintenance Section
5.17 Manpower in the Circulation Section
5.18 Manpower in the Periodicals Section
5.19 Manpower in the Reference Section
5.20 Manpower in the Documentation Section
5.21 Manpower in the Information Technology Section
5.22 Manpower in the Administration Section
5.23 Manpower in other sections
5.24 Supervisory staff in different university libraries
5.25 Strength of professionals in central libraries
5.26 General qualification of the professionals
5.27 Professional qualification of the staff
5.28 Additional qualifications/skills acquired by the staff
5.29 Present position of professional manpower
5.30 Section wise distribution of unskilled staff
5.31 Sanctioned posts and vacant posts of non-professionals
5.32 Recruitment of staff during the period 1999 - 2004
5.33 Correlation of existing professionals with the estimated staff as per the staff formula in the Acquisition Section
5.34 Correlation of existing professionals with the estimated staff as per the staff formula in the Technical Section

5.35 Correlation of existing professionals with the estimated staff as per the staff formula in the Maintenance Section

5.36 Correlation of existing professionals with the estimated staff as per the staff formula in the Circulation Section

5.37 Correlation of existing professionals with the estimated staff as per the staff formula in the Periodicals Section

5.38 Correlation of existing professionals with the estimated staff as per the staff formula in the Reference Section

5.39 Correlation of existing professionals with the estimated staff as per the staff formula in the Documentation/Information Section

5.40 Correlation of existing staff with the minimum required in the IT Section

5.41 Professional manpower in different sections

5.42 Number of semi-professionals required as per Ranganathan's Formula

5.43 Number of non-professional staff in different university libraries

5.44 Required staff strength in manual system as per the ATSM Model

5.45 Required staff strength in computerized system as per the ATSM Model

5.46 Correlation of number of professionals estimated through staff formula and ATSM model

5.47 Correlation of strength of existing professionals with the estimation as per the ATSM model

5.48 Comparison of the number of non-professionals estimated

6.1 University and designation of professionals

6.2 University-wise analysis of the different categories of respondents

6.3 Gender-wise distribution of the professionals

6.4 Age-wise distribution of professionals

6.5 Basic pay of professionals

6.6 General qualification of the professionals

6.7 Professional qualification of the staff
6.8 Mode of study of BLISc and MLISc courses
6.9 Additional qualifications/skills acquired by the staff
6.10 Details of previous employment
6.11 Years of experience in the present institution
6.12 University-wise index of attitude towards leadership, vision and career prospects
6.13 ANOVA result on university-wise variation of attitude towards leadership, vision and career prospects.
6.14 Designation-wise analysis of index of attitude
6.15 ANOVA result on designation-wise variation of attitude
6.16 Category-wise index of attitude
6.17 ANOVA result on category-wise variation of attitudes
6.18 Gender-wise analysis of index of attitude
6.19 ANOVA result on gender-wise variation of attitudes
6.20 Age-wise analysis of index
6.21 Qualification-wise analysis of index of attitude
6.22 Attitudinal analysis based on experience
6.23 University-wise analysis of factors of job satisfaction
6.24 ANOVA result showing university-wise variation among factors of job satisfaction
6.25 Designation-wise analysis of factors of job satisfaction
6.26 Category-wise analysis of factors of job satisfaction
6.27 Gender-wise analysis of factors of job satisfaction
6.28 Age-wise analysis of factors of job satisfaction
6.29 ANOVA result on age-wise variation of factors of job satisfaction
6.30 Salary-wise analysis of factors of job satisfaction
6.31 Qualification-wise analysis of factors of job satisfaction
6.32 ANOVA result on qualification-wise variation of factors of job satisfaction
6.33 Experience-wise analysis of factors of job satisfaction
6.34 University-wise analysis of overall rating of job satisfaction
6.35 Designation-wise analysis of overall rating of job satisfaction
6.36 Category-wise analysis of overall rating of job satisfaction
6.37 Gender-wise analysis of overall rating of job satisfaction
6.38 Age-wise analysis of overall rating of job satisfaction
6.39 Qualification-wise analysis of overall rating of job satisfaction
6.40 Experience-wise analysis of overall rating
6.41 University-wise analysis of desire to stay with the library
6.42 Designation-wise analysis of desire to stay with the library
6.43 Category-wise analysis of extent of desire to stay with the library
6.44 Gender-wise analysis of extent of desire to stay with the library
6.45 Age-wise analysis of extent of desire to stay with the library
6.46 Qualification-wise analysis of extent of desire to stay with the library
6.47 Experience-wise analysis of extent of desire to stay with the library
6.48 Frequency of sending applications for jobs in other organizations
6.49 Category-wise analysis of frequency of sending applications
6.50 Gender-wise analysis of frequency of sending applications
6.51 Qualification-wise analysis of frequency of sending applications
6.52 Reasons for applying for jobs elsewhere
6.53 University-wise analysis of participation in CEPs
6.54 Designation-wise analysis of participation in CEPs
6.55 Category-wise analysis of participation in CEPs
6.56 Gender-wise analysis of participation in CEPs
6.57 Experience-wise analysis of participation in CEPs
FIGURES

3.1 Factors affecting job attitudes

4.1a Outlay on employees and documents, equipment and furniture of KUL

4.1b Outlay on employees and documents, equipment and furniture of CUL

4.1c Outlay on employees and documents, equipment and furniture of CUSAT

4.1d Outlay on employees and documents, equipment and furniture of MGUL

4.1e Outlay on employees and documents, equipment and furniture of KAUL

4.2 Average expenditure per employee

5.1 Strength of the professionals in the central libraries

5.2 Present position of professional manpower

5.3 Sanctioned and vacant posts of non-professionals

5.4 Correlation of existing professionals with the estimated number as per staff formula in the Acquisition Section

5.5 Correlation of existing professionals with the estimated number as per staff formula in the Technical Section

5.6 Correlation of the existing professionals with the estimated number as per staff formula in the Maintenance Section

5.7 Correlation of the existing professionals with the estimation as per the staff formula in the Circulation Section

5.8 Correlation of the existing professionals with the estimated number as per staff formula in the Periodicals Section

5.9 Correlation of the existing professionals with the estimation based on staff formula in the Reference Section

5.10 Comparison of existing and required non-professional staff

5.11 Required staff strength in the manual system as per the ATSM Model

5.12 Required staff strength in the computerized system as per the ATSM Model
5.13 Comparison of the number of professionals estimated through staff formula and ATSM Model

5.14 Correlation of the strength of existing professionals with the estimation as per ATSM Model

6.1 University-wise index of the attitude towards the employer in terms of leadership, vision and career prospects

6.2 Designation-wise index of attitude towards the employer

6.3 University-wise index of factors of job satisfaction

6.4 Designation-wise index of factors of job satisfaction

6.5 University-wise rating of overall job satisfaction

6.6 Designation-wise rating of overall job satisfaction

6.7 University-wise analysis of desire to stay with the library

6.8 Designation-wise analysis of desire to stay with the library

6.9 University-wise analysis of participation in seminar/workshop/in-service training etc.

6.10 Designation-wise analysis of participation in seminar/workshop/in-service training etc.
