Acknowledgement

First of all I wish to deliver my sincere thanks to my Ph.D guide Dr. Anil Kumar Chhillar. He always listened to me and provided everything in terms of encouragement, support, boost and a familial environment in the lab. This thesis would not have been possible without his guidance, inspiration, persistent help and a lesson to “meet deadlines”. He showed me the path of hard work and truth. His philosophical and practical advice always helped me to follow this tough path with ease. I will forever remember his constant moral support, informal and open discussions, deep thinking, critical analysis, judgments and valuable suggestions that has been my great source of strength throughout my doctoral work. I will definitely try to emulate his transparent style of conducting things and applying the outcome for the benefit of all. He always wanted me to stand nearest to perfection, because in this world “no one is perfect”, we can only put our hardest effort to reach perfection. I could not have imagined having a better advisor and mentor for my Ph.D study.

I would also like to thank Director / Ex-Director and other teachers of Centre for Biotechnology for providing the necessary facilities and support.

I am also very thankful to all my teachers: Prof. Ravi Parkash, Dr. Sunil Kumar Chhikara, Sh. K C Shingla and Sh. Jagmesh Jakhar for their excellent teaching and motivation.

I take this opportunity to sincerely acknowledge the Council of scientific & industrial research, Government of India, New Delhi, for providing financial assistance in the form of Junior/Senior research fellowship which buttressed me to perform my work comfortably.

I am indebted to my colleagues and friends for providing a stimulating and fun filled environment. My thanks go in particular to Dr. Manish Kumar, Dr. Sandeep Grover, Tilakraj, Dr. Kapil and Ramkumar. I am also thankful to Meenakshi, Sonam, Anu Singh, Nitu, Mrridula and Mrs. Anjum Hooda for their support.

Words fail me to express my appreciation to my Parents (Sh. Ved Parkash & Smt. Bimla Devi) and sisters for their support, generous care. They were always beside me during the happy and hard moments to push me and motivate me. I would like to pay high regards to them for their sincere encouragement and inspiration throughout my research work and lifting me uphill in this phase of life.
I convey special acknowledgement to my wife (Dr. Seema Dhankhar), who was always there when I really needed. I can see the good shape of my thesis because of her help and suggestions in formatting the entire thesis. A journey is easier when you travel together. Interdependence is certainly more valuable than independence. Thank you doesn’t seem sufficient but it is said with appreciation and respect to her for support, encouragement, care, understanding and precious friendship.

During the inevitable ups and downs of conducting my Research I often reminded life’s true priorities by what could be the influence of God. This helped me a lot to work for hours together tirelessly. With the grace of God I have been able to complete this work. Last but certainly not the least, I wish to thanks God for always channelizing a positive energy in my body to fulfil expectations of all people associated with me.

(Sandeep Dhankhar)
