Spectroscopic studies of some organic molecules

CONTENTS

PRELUDE

CHAPTERS PAGE NO.s

I. GENERAL INTRODUCTION

1.1. Introduction 1
1.2. Various photophysical processes of excited molecules 4
1.3. Scope of the present work 10
1.4. References 12

II. INSTRUMENTATION

2.1. UV-Visible Absorption Spectrophotometer 17
2.2. Fluorescence Spectrophotometer 20
2.3. Time-Correlated Single Photon Counting System 22
2.4. References 25

III. STEADY-STATE AND TIME-RESOLVED FLUORESCENCE STUDIES OF ANTHRYLACRYLIC ESTER

3.1. Introduction 26
3.2. Experimental 29
3.3. Results and discussion
   a. Steady state absorption and fluorescence excitation studies 29
   b. Fluorescence emission studies (Concentration and excitation wavelength dependence emission studies) 36
   c. Solvatochromic shift measurements 54
   d. Fluorescence decay measurements 58
3.4. References 66

Department of Physics, Karnataka University, Dharwad
Spectroscopic studies of some organic molecules

IV. FLUORESCENCE QUENCHING OF ANTHRXYVINYL ACETATE BY CARBON TETRACHLORIDE

4.1. Introduction 70
4.2. Experimental 73
4.3. Results and discussion
   a. Steady state measurements (Absorption, Fluorescence excitation, Fluorescence emission and quenching measurements) 73
   b. Fluorescence decay measurements 98
4.4. References 102

V. STEADY-STATE AND TIME-RESOLVED EMISSION STUDIES OF THIOFLAVIN-T

5.1. Introduction 106
5.2. Experimental 108
5.3. Results and discussion
   a. Steady state absorption and fluorescence excitation studies 109
   b. Fluorescence emission studies 114
   c. Fluorescence quantum yield measurements 127
   d. Determination of excited state dipole moment 127
   e. Fluorescence decay measurements 129
   f. Fluorescence anisotropy measurements 130
5.4. References 139

VI. SUMMARY AND CONCLUSIONS 142
