ACKNOWLEDGEMENT

First of all, I am thankful to the Institute of Bioresources and Sustainable Development (IBSD), (an autonomous institute of the Department of Biotechnology, Govt. of India), Takyelpat Institutional Area, Imphal, Manipur for providing me the opportunity as well as its infrastructure to carry out my research work under its intramural research project (MRD 3.3). My appreciation also goes to the Department of Biotechnology (DBT), Govt. of India for the research grant (grant no.: BT/PR-9268/FNS/20/342/2007) provided to IBSD for an extramural project for which I worked as Junior Research Fellow and which was the genesis of my Ph.D. career. I would like to thank the Council of Scientific and Industrial Research (CSIR), Govt. of India for providing me the Senior Research Fellowship grant (grant no.: 09/1044/(0001)/2011/EMR-I) to partially support the funding of my Ph.D. research work during April 2011 to February 2013. I am grateful to the International Committee on Food Microbiology and Hygiene (ICFMH) of the International Union of Microbiological Societies (IUMS) for providing the international travel grant "Sponsorship of Young Scientists from Developing Countries by the ICFMH" to attend the 24th International ICFMH Conference "Food Micro 2014" from 1st - 4th September, 2014 at Nantes, France.

At this moment of achievement, I consider this a privilege to extend my deepest gratitude to my mentor and supervisor Dr. K. Jeyaram, Scientist- C, Microbial Resources Division, IBSD, Takyelpat Institutional Area, Imphal, Manipur, for his admirable and dedicated supervision, support, encouragement and forging a competitive research environment. His expertise and deep insights into
the subject have helped me at various stages of my Ph.D. tenure. He persistently showed us a spirit of research, taught us to think and work on par with the international research scenario and provided the liberty to move ahead, which had founded the real sense of scientific temperament within me. He was the one who initiated the baseline programme of research on the microbiology of fermented bamboo shoots through the above mentioned DBT funded project, which with his continuous support was extended to conceive in the form of my Ph.D. research work. His valuable help and suggestions during the preparation of manuscripts and compilation of thesis are sincerely appreciated. Without his great effort for continuous help and guidance, I would not be able to complete my research work.

I extend my sincere gratitude to my supervisor Prof. G. U. Ahmed, Department of Biotechnology, Gauhati University, Guwahati, Assam for accepting me as his Ph.D. student and extending guidance, support and understanding during the course of my research work. His invaluable suggestions during my thesis compilation are sincerely appreciated. Without his help, my thesis would not have been possible.

At this moment, I consider this a privilege to show my sincere thankfulness to Dr. N. C. Talukdar, Director, Institute of Advanced Study in Science and Technology (IASST), Guwahati, Assam (Former Director In-charge, IBSD, Takyelpat Institutional Area, Imphal, Manipur) for allowing me to pursue and continue my Ph.D. besides being a researcher in extramural projects. In addition, his continuous and unrestricted support in providing various research requirements during the course of my Ph.D. research work are highly appreciated.
My sincere thanks also goes to Prof. Mrs. R. J. Bharali, Head, Department of Biotechnology, Gauhati University for her support in official proceedings.

My special appreciation goes to the anonymous traditional producers of indigenous fermented bamboo shoot products of North East India (soidon of Bishnupur, Manipur; soibum of Andro and Kwatha, Manipur; hikhu of Ziro, Arunachal Pradesh and sele of Ruzaphema, Nagaland) for sharing their indigenous traditional knowledge and carrying out the indigenous fermentations for my research.

I am extremely indebted to my fellow mates, Mr. Thangjam Anand Singh and Mr. Santosh Keisam for their consistent support and help during sample collection and discussion of research problems and findings. Mr. Santosh Keisam deserves my special appreciation for his dedicated support during preparation of manuscripts and thesis compilation. The support from Mrs. R. K. Basanti Devi, Ms. Ngangyola Tuikhar, Mr. Imrat and Mrs. Kh. Romapati Devi during the course of my research work are also appreciated.

I am thankful to the non-scientific staffs of the administrative, accounts, electrical and engineering sections of IBSD, Takyelpat Institutional Area, Imphal, Manipur for their supports during my Ph.D. tenure. The cooperation extended by the security personals of IBSD, particularly during my late stay in the laboratory for carrying out my various experiments, are highly appreciated.

I extend my sincere and deepest gratitude to my beloved parents who have always been caring, encouraging and providing unending support to me in each and every period of my life. Without their well wishes and encouragement, I would not be able to reach the current position of my career. Last but not the least, I thank
several anonymous persons who knowingly or unknowingly supported me during the course of my Ph.D. research work.

Wahengbam Romi
