LIST OF TABLES

1. **Table 1.1**: List of the compounds reported in *Memecylon*, including structures discovered before, as well as the species and plant from which they have been isolated.

2. **Table 2.1**: Phytochemical analysis of *M. terminale Dalz* extracts

3. **Table 2.2**: The percentage (g/100g) of total phenolics and flavonoids content of *M. terminale Dalz* extracts (as Catechol equivalent)

4. **Table 2.4**: C, H, N analysis

5. **Table 3.1**: Antibacterial activity of *M. terminale Dalz* extracts

6. **Table 3.2**: Minimum inhibitory concentration of *M. terminale Dalz* extracts

7. **Table 4.1**: Total antioxidant activity of *M. terminale Dalz* extracts

8. **Table 5.1**: Effect of *M. terminale Dalz* extracts on the blood glucose levels

9. **Table 5.2**: Effect of *M. terminale Dalz* extracts on the blood glucose levels

10. **Table 5.3**: Effect of *M. terminale Dalz* plant extracts on total cholesterol (TC), triglyceride (TG), HDL, LDL and VLDL levels in rats

11. **Table 5.4**: Inhibition of α-glucosidase and α-amylase by *M. terminale Dalz*

12. **Table 6A.1**: Anti-inflammatory activity of *M. terminale Dalz* extracts

13. **Table 6B.1**: Survival rate of cancer cells as affected by the concentration of *M. terminale Dalz* plant extracts
14. **Table 6B.2**: Survival rate of cancer cells as affected by the concentration of purified compounds of *M. terminale Dalz* plant extracts

15. **Table 6C.1**: The IC<sub>50</sub> values of crude plant extracts, standard drug and purified compounds

16. **Table 7.1**: Effect of *Memecylon terminale Dalz* plant extracts on acetic acid-induced writhing in test mice

17. **Table 7.2**: Effect of different plant extracts of *Memecylon terminale Dalz* on latency to hot plate test in mice

18. **Table 7.3**: Hepatoprotective activity of different extracts of *M. terminale Dalz*

19. **Table 7.4**: Pathological changes in the liver morphology of rats treated with CCl<sub>4</sub>, standard drug, Silymarin and various extracts of *M. terminale Dalz*.
