Acknowledgement

A work of research carried out at the fag end of one’s career, needless to say alongwith the continuous demands at the professional and domestic fronts, could not have been possible if help didn’t come from all quarters, solicited or voluntary, all with the genuine intention of helping me sail through this whole project. I cannot, but pause and express my gratitude to all who were a part of this enterprise, and helped me in piecing together bits of data, literature, facts, figures and analysis in the present form.

My sincerest and deepfelt gratitude to my Research Supervisor, Dr. Anil Kumar Srivastav, Assistant Professor, Department of Zoology, Government V.Y.T.P.G. His profound knowledge and dextrous handling of the complexities of research has kept me on an even keel of motivation and enthusiasm.

A word here also for my angel daughter, Ms. Faaizah Husain, who has been very understanding and forgiving for the neglect of my maternal responsibilities towards her during this period of research. Her contribution in making me strong morally and emotionally to cope with all the rise and fall of the phase is beyond words.
