</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Distribution of sample based on age, gender and religion</td>
<td>76</td>
</tr>
<tr>
<td>1.2</td>
<td>Distribution of sample according to educational status</td>
<td>77</td>
</tr>
<tr>
<td>1.3</td>
<td>Distribution of subjects based on previous occupation</td>
<td>78</td>
</tr>
<tr>
<td>1.4</td>
<td>Distribution of sample based on marital status</td>
<td>78</td>
</tr>
<tr>
<td>1.5</td>
<td>Distribution of sample based on number of children</td>
<td>79</td>
</tr>
<tr>
<td>1.6</td>
<td>Distribution of subjects based on employment status of children</td>
<td>79</td>
</tr>
<tr>
<td>1.7</td>
<td>Distribution of sample based on nature of admission and duration of stay in the old age home</td>
<td>80</td>
</tr>
<tr>
<td>1.8</td>
<td>Distribution of subjects based on Source of income</td>
<td>81</td>
</tr>
<tr>
<td>1.9</td>
<td>Distribution of sample based on chronic diseases and physical dependence</td>
<td>81</td>
</tr>
<tr>
<td>1.10</td>
<td>Distribution of sample based on history of illness.</td>
<td>82</td>
</tr>
<tr>
<td>1.11</td>
<td>Distribution of sample based on reported number of health problems</td>
<td>83</td>
</tr>
<tr>
<td>1.12</td>
<td>Distribution of sample based on number of visitors</td>
<td>84</td>
</tr>
<tr>
<td>1.13</td>
<td>Comparison of experimental and control group on selected baseline variables using Mann-Whitney test.</td>
<td>84</td>
</tr>
<tr>
<td>2.1</td>
<td>Skewness and Kurtosis of the psychological variables</td>
<td>86</td>
</tr>
<tr>
<td>2.2</td>
<td>Tests of normality for the psychological variables</td>
<td>87</td>
</tr>
<tr>
<td>3.1</td>
<td>Between group comparison of pre test values of morale, depression and subjective well-being</td>
<td>87</td>
</tr>
<tr>
<td>4.1</td>
<td>Within group comparison of experimental group on Morale (using Friedman test) between 5 Time points</td>
<td>88</td>
</tr>
<tr>
<td>4.2</td>
<td>Within group comparison of control group on morale between 5 time points by Friedman Test</td>
<td>89</td>
</tr>
<tr>
<td>4.3</td>
<td>Comparison of control and experimental group on morale between 5 time points using Mann-Whitney Test</td>
<td>90</td>
</tr>
<tr>
<td>4.4</td>
<td>Within group comparison of experimental group on depression (using Friedman test) between 5 time points</td>
<td>91</td>
</tr>
<tr>
<td>4.5</td>
<td>Within group comparison of control group on depression between 5 time points by Friedman test on depression (by GDS)</td>
<td>92</td>
</tr>
</tbody>
</table>
4.6 Between group comparison of depression (GDS score) using Mann-Whitney test 93
4.7 Within group comparison of experimental group between 5 time points on Hamilton Rating Scale for depression using Friedman test. 94
4.8 Within group comparison of control group between 5 time points on Hamilton Rating Scale for depression using Friedman test 95
4.9 Between group comparisons of control group and experimental group on depression (based on HRS) during 5 time points using Man-Whitney test 96
4.10 Within group comparison of experimental group – WHO well-being Index 97
4.11 Within group comparison of control group (WHO well being index) 98
4.12 Between group comparison of experimental group and control group on subjective well being (WHO – well being Index) using Mann-Whitney test 99
5.1 Between group comparison of Respiratory Rate 104
5.2 Within group comparison of Respiratory Rate 105
5.3 Between group comparison of Resting Heart Rate Ranks 106
5.4 Within group comparison of Resting Heart Rate 107
5.5 Between group comparison of Peripheral skin temperature 108
5.6 Within group comparison of Peripheral Skin temperature 109
5.7 Between group comparison of Oxygen saturation 110
5.8 Within group comparison of Oxygen saturation 111
5.9 Between group comparison of Blood Pressure values 112
5.10 Within group comparison of Blood Pressure values 113
5.11 Between group comparison of ECG 114
5.12 Within group comparison of ECG 115
6.1.1 Association between Age and PGS scores 116
6.1.2 Association between Age and GDS scores 117
6.1.3 Association between Age and HRS Scores 118
6.1.4 Association between Age and WHO Well Being Index Score 119
6.2.1 Association between gender and PGS scores 120
6.2.2 Association between gender and GDS scores 121
6.2.3 Association between gender and HRS Scores 122
6.2.4 Association between gender and WHO Well Being Index Score 123
6.3.1 Association between religion and PGS scores 124
6.3.2 Association between religion and GDS scores 125
6.3.3 Association between religion and HRS Scores 126
6.3.4 Association between religion and WHO Well Being Index Score 127
6.4.1 Association between Education and PGS scores 128
6.4.2 Association between Education and GDS scores 129
6.4.3 Association between Education and HRS Scores 130
6.4.4 Association between Education and WHO Well Being Index Score 131
6.5.1 Association between marital status and PGS scores 132
6.5.2 Association between marital status and GDS scores 133
6.5.3 Association between marital status and HRS Scores 134
6.5.4 Association between marital status and WHO Well Being Index Score 135
6.6.1 Association between number of children and PGS scores 136
6.6.2 Association between number of children and GDS scores 136
6.6.3 Association between number of children and HRS Scores 137
6.6.4 Association between number of children and WHO Well Being Index Score 137
6.7.1 Association between Nature of admission and PGS scores 138
6.7.2 Association between Nature of admission and GDS scores 139
6.7.3 Association between Nature of admission and HRS Scores 140
6.7.4 Association between Nature of admission and WHO Well Being Index Score 141
6.8.1 Association between Duration of stay and PGS scores 142
6.8.2 Association between Duration of stay and GDS scores 143
6.8.3 Association between Duration of stay and HRS Scores 144
6.8.4 Association between Duration of stay and WHO Well Being Index Score 145
6.9.1 Association between chronic diseases and PGS scores 146
6.9.2 Association between chronic diseases and GDS scores 147
6.9.3 Association between chronic diseases and HRS Scores 148
6.9.4 Association between chronic diseases and WHO Well Being Index Score 149
6.10.1 Association between physical dependence and PGS scores 150
6.10.2 Association between physical dependence and GDS scores 151
6.10.3 Association between physical dependence and HRS Scores 152
6.10.4 Association between physical dependence and WHO Well Being Index Score 153
6.11.1 Association between visitors and PGS scores 154
6.11.2 Association between visitors and GDS scores 155
6.11.3 Association between visitors and HRS Score 156
6.11.4 Association between visitors and WHO Well Being Index Score 157
