ACKNOWLEDGEMENTS

Every fruit of success is analogous to a particular mode of labour or at times a team of laborious hands. My achievement concurs with the second. This Thesis embodies a stock of fruitful suggestions for which I humbly owe each one of them a special word of praise.

At the outset I extend my deep sense of gratitude right from the core of my heart to Dr. (Mrs.) Madhu Kamra. The unfathomable zeal, earnest help and tremendous perseverance of my honourable guide compelled me to enrich my research work and helped me to gain the light of success. I am really grateful to her for sparing me hours in midst of strenuous regular college routine and then after at home, while she was expected to be with her family.

I also want to thank the librarians and staff of National Library in Kolkata, British Council Library, Durga Mahavidyalaya, Raipur & Pt. Ravishankar Shukla University, Raipur for helping me to find the necessary materials related to my research work.

It would not be out of place to extend my thanks to all the members of my family who provided me emotional, logistical support and, motivated me when I felt depressed. They were always there whenever I needed a helping hand.

The regular calls and visits of my friend Mr. Surojit Mukherjee, were sources of continuous inspiration. The assistance provided by Mr. Tulsi Sahu, who brought this work to reality, can not be expressed in words. He spent hours together typing and retyping indefatigably.
