ACKNOWLEDGEMENTS

My fervent indebtedness is due to my revered teacher and mentor Professor S.P. Narula, Ph.D. (Panjab and Manchester), F.R.S.C., Chairman, Chemistry Department, Panjab University, Chandigarh, whose unstinted and dexterous guidance and ungrudging help enabled me in giving the study its present shape. I am highly indebted to him for his stimulating instructions and intellectual inspiration throughout the course of this research work. I am extremely thankful to him for providing me adequate laboratory facilities.

My glowing thanks are due to my worthy laboratory colleagues, Dr. Ravi Shanker, Sukhjeewan, Harjeet Singh Kalja, Manish Puri, Meenu, Ritu and Satvinder for their help and constant encouragement during the tenure of this study. I would like to recall my old laboratory colleagues, Dr. Rajeev Sharma, Shashikant Bhardwaj, Dr. Rajesh Malhotra, Vijay Chopra, Yash Sharda, Neelima, Balwant and Dr. Rajwant for the numerous ways in which they have encouraged me throughout.

My friends Manish Manik, Neeraj Sanger, Kamal Kishore, Somjit, Sandeep, Dr. Mandeep, Narinder Goyal, Rampaul Bajaj, Harish Chopra, Baljeet Singh, Shekher Bembi, Darshan Goyal, Rajesh Prabhakar, Neeraj Kulshreshtha and Parveen Goyal have been on my side at all times and been so caring and supportive.

Thanks is probably too minuscule a word for my respected parents, brother Rajeev, sisters Sheila, Bela and brother-in-law Mr. Sandeep Bedi, for all that they have done for me. The love, the inspiration, the care and the support that they have given me from time to time has been too overwhelming.

I also express my sincere thanks to Dr. R.K. Chadha, Department of Chemistry, Scripps Research Institute, La Jolla, CA, 92037, USA for X-ray crystal data. I wish to acknowledge my special indebtedness to UGC and CSIR (New Delhi) for providing the financial assistance to complete this study. I am also thankful to TIFR (Bombay) and IISc (Bangalore) for multinuclei NMR spectral studies. Avtar Singh, Dr. Damanjeet, Harish, Joginder Singh, Gurwark Singh and other technical and administrative staff are also thankfully acknowledged.

My expression of debt of gratitude will not be complete if I do not express my thanks to Mr. Mohit Shrivastava and Ms. Kanta Sharma of NEST for the consistent efforts they have cheerfully made during the typing and compilation of this thesis on Laser Ventura.
