ACKNOWLEDGEMENT

"science is the systematic classification of experience"

George Henry Lewis

I am indebted to Dr. K. R. Mani, Assistant Director, Pasteur Institute of India, Coonoor for accepting me as a Ph.D., student. He provided full academic freedom and rendered generous support for my research work and writing the thesis. His vast knowledge in microbiology, critical analysis and advice helped me to complete the work successfully. I convey my whole-hearted thanks to Dr. N. Elangeswaran, Director, Pasteur Institute of India, for his encouragement in carrying out the work.

It is my great pleasure to express thanks to Dr. S. Ramalingam, Principal, Dr. T. M. Subba Rao, Vice Principal of PSG IMS&R, and Dr. Vimal Kumar Govindan, Medical Director of PSG Hospitals, for the support and facilities provided. With deep sense of gratitude, I express my heartfelt thanks to Dr. B. Appala Raju, Professor and Head, Department of Microbiology, PSG IMS&R, for his valuable suggestions, and timely guidance. He not only encouraged me to pursue the work but was ready to help whenever needed.

It gives me immense pleasure to thank Dr. G. A. Jacoby, Infectious disease Department, Lahey Clinic, Massachusetts, U.S.A for helping me by carrying out Molecular studies for few representative ESBL positive isolates, and also for confirming the presence of ESBL in the clinical isolates, which helped me to successfully finish the research.

My whole-hearted thanks to Mr. Rajesh Kumar John, Bio-statistician for extending support with statistical analysis of my research work. My special acknowledgment to Dr. M. K. Lalitha, Professor, Department of Clinical Microbiology, Christian Medical College, Vellore, for her personal encouragement and permitting me to use molecular lab facilities, and to Dr. Dilip Mathai, Professor, Department of Medicine and Infectious Diseases, for his valuable suggestions. My special thanks to Dr. Rekha
Pai, Mr. Aaron and Mr. Ajoykumar, who helped me in learning and carrying out Molecular work.

I extend my sincere and heartfelt thanks to Mr. S. Sreedharan, Mr. M. Farook and all the staff of Pioneer Diagnostic laboratory for their kind co-operation and sustained support during the study.

I am grateful to all the faculty members, secretary, technicians, and technical assistants of Microbiology Department of PSG IMS&R for their constant moral support and help during the research.

A special note of thanks is due to Mr. R. Rajendren, Microbiologist PSG college of Arts and science for his consistent guidance and encouragement.

I owe a profound intellectual debt to numerous authors whose ideas and contributions have shaped my thinking in completing the thesis.

I am grateful to my husband Mr. S. Rajasekaran and daughter Miss. R. Bhairavi, for their emotional support and co-operation during my study period. There are many of those who have helped me but may have not been mentioned, but none are forgotten.

Finally the grace of ALMIGHTY has been with me through out the work.
