Acknowledgement
ACKNOWLEDGEMENTS

In pursuing my research I am so grateful for the sense of graven encouragement which I had received from the following dignitaries.

Words are but a poor vehicle of thoughts and feelings will be only a feeble reflection of my profound gratitude and indebtedness with due respect to my guide, Dr. S.P. Rajendran, Professor, Department of Chemistry, Bharathiar University, Coimbatore, for initiating me into this field of research and for his unflinching guidance, suggestions, incessant encouragement, focusing criticism, perusal preparation of the manuscript, patience and instant provision of all the requirements throughout the course of my work, which has shaped the form and content of this thesis.

I record my deep sense of gratitude and I will remain obliged to Dr. K, Natarajan, Professor and Head, Department of Chemistry, Bharathiar University, Coimbatore, who generously provided all the necessary facilities and showed his kindness and good wishes throughout my work.

I express my recondite thanks to my teachers, Dr. K.J. Rajendra Prasad, Dr. S. Govindarajan and Dr. P.S. Mohan, Professors, Department of Chemistry, Bharathiar University, Coimbatore, for their invaluable help, suggestions and discussions during the tenure of my study.

My sincere thanks are due to the authorities of Bharathiar University, Coimbatore, for granting University Research Fellowship.

I gratefully acknowledge Sophisticated Instruments Facility, I.I.Sc., Bangalore, Indian Institute of Chemical Technology, Hyderabad, SPIC Foundation, Chennai and Central Drug Research Institute, Lucknow, for providing 1H and 13C NMR and Mass Spectrometry.

It is my pride and pleasure to seize this opportunity to thank Dr. K, Udayan, Professor, Department of Botany, Bharathiar University, Coimbatore and Dr. A. Ravi, Principal, Sri Ramakrishna College of Pharmacy, Coimbatore, for carrying out biocidal studies.

I am ever grateful to Dr. G. Arul Prakash, for his invaluable suggestions and discussions during the study.

It would be an obvious fact of my ignorance if I fail to spread my sincere and heartfelt thanks to my dearest friends, without whose love and care, help and assistance, encouragement and guidance,
the thesis would not have been in a form of what it is now. No amount of thanks will repay my debt to my friends Suresh, Damodaran, Brahmanandhan, Sampath Kumar, Anand, Pethurajan, Basker, Vishwanathan and Anbalagan who stood by me both during my happy and difficult times my thesis would be incomplete.

I take this opportunity to acknowledge my colleagues, Mr. I. Antony Danish, and Mrs. V. Nithya Devi Research Scholars, M.Sc., Students, Department of Chemistry, Bharathiar University, Coimbatore, for their enthusiastic support and help.

I also thank my juniors, A Selvi, A Murugesh, K Srinivasan, R Selva Kumar and K Lakshmi Kandhan for their pleasant association and invaluable help at various stages of this study.

I wish to thank, Mr. S. Ganesan, Mr. K. KandaVadivel, Mr. P. Arokiamy, Mrs. V. Pushpavalli, Mrs. M.V. Kaveri, Mrs. R. Shanthi, and Mr. K. Palanisamy office staffs in the Department of Chemistry, Bharathiar University, Coimbatore for their assistance.

Mere acknowledgement may not repay the debt for the blessings and sacrifices from my parents, sister, brother in law and well-wishers to put forth their volunteer hands to complete my work.

Above all, I thank the God Almighty for his unending grace without whom nothing can be realized.

N. Venkatesh Kumar
