Chapters	Particulars	Page No.
	Acknowledgements	i
	List of Tables	vii
	List of Figures	viii
	Abbreviations	x
1.	INTRODUCTION	01
1.1.	History of the <i>Centella asiatica</i>	03
1.2.	Introduction of the <i>Centella asiatica</i>	04
1.3.	Taxonomical Description of the plant.....	05
1.4.	Common Name in different language of the <i>Centella</i>	06
1.5.	Medicinal Uses of the <i>Centella asiatica</i>	06
1.6.	Chemical Constituents of <i>Centella asiatica</i>	07
1.7.	Overview on Plant Bioactive Compounds	08
1.8.	Medicinal and Commercial Importance of Bioactive Compounds.....	10
1.9.	Triterpenoid Saponins of the <i>Centella asiatica</i>	11
1.10.	Essential of the present study on <i>Centella asiatica</i>	12
1.11.	Strategies to Increase Secondary Metabolite Production in <i>Centella</i>	13
1.12.	Objectives of the Present Research	16
1.13.	Significance of the Present Research.....	17
2.	REVIEW OF LITERATURE.....	18
2.1.	Plant Description	19
2.2.	Geographical Source in the <i>Centella</i>	20
2.3.	Cytological Variations on <i>Centella</i> Species	20
2.4.	Conservation Status of the Plant	21
2.5.	Medicinal Importance of the Plant	21
2.6.	Chemical Constituents of the <i>Centella asiatica</i>	25
2.7.	Triterpenoid Saponins Active Compounds of <i>Centella asiatica</i>	26
2.8.	Natural of the Polyploidy	28
2.9.	Induction of Polyploidy	29
2.10.	Effects of Environmental Variation on the Content of Bioactive Components	33
2.11.	Effect of Polyploidy on the Content of Bioactive Components.....	34
2.12.	Induction of the Somaclonal Variation.....	35
2.13.	Effect of Somaclonal Variation on the Content of Chromosomal Variation.....	35
2.14.	Effect of Somaclonal Variation on the Content of Bioactive Components	37
2.15.	Methods for Assessing Triterpene Glycosides.....	39

3. MATERIAL AND METHODS	42
3.1. Experimental Plant Material	42
3.2. Propagation and Cultivation	42
3.3. Methods Employed	43
3.3.1. Induction of Autotetraploidy.....	44
3.3.1.1. Chemical agent for Induction of Autotetraploidy	44
3.3.1.2. Method for Induction of Autotetraploidy.....	45
3.3.2. Induction of Somaclonal Variation.....	46
3.3.2.1. Preparation of Nutrient Medium.....	47
3.3.2.2. Plant Growth Hormones	47
3.3.2.3. Supplementation of Nutrient Medium with Different Growth Hormones	49
3.3.2.4. Other Supplementations and Steps Involved in Preparation of Medium	49
3.3.2.5. Explant Selection and Sterilization.....	50
3.3.2.6. Initiation of Explant Cultures.....	51
3.3.2.7. Transplantation and Acclimatization of the plantlets.....	52
3.4. Morphological Analysis.....	53
3.4.1. Quantitative Estimation of Morphological Parameters.....	53
3.5. Stomatal Analysis	54
3.6. Cytological Studies	55
3.6.1. Selection and Fixation of Root Tips	55
3.6.2. Staining Method	55
3.7. Biochemical Characterization	56
3.7.1. Preparation of Samples for Biochemical Analysis.....	56
3.7.2. HPLC Analysis of Saponins and Sapogenins Contents.....	56
3.7.3.1. Preparation of Samples for HPLC.....	56
3.7.3.2. Preparation of Standard Solution.....	57
3.7.3.3. Chemicals and Reagents of HPLC Analysis	57
3.7.3.4. Instrumentation and Chromatographic Conditions.....	57
4. EXPERIMENTAL RESULTS...	59
4.1. Effect of Colchicine Concentration on Survival rate of Treated plants.....	59
4.2. Effective Method of Colchicine Treatment for Induction of Auto- tetraploidy in <i>Centella asiatica</i>	62
4.3. Effective Concentration of Colchicine and Treatment Duration for Induction of Autotetraploidy	62
4.4. Establishment of Autotetraploidy in Colchicine Treated <i>Centella</i> plants....	64
4.5. Morphometric Traits of Colchiploids.....	64

4.5.1. Plant Height.....	65
4.5.2. Inter-nodal Length.....	65
4.5.3. Leaf Characteristics.....	66
4.5.4. Length and Width of Petioles.....	68
4.5.5. Fresh and Dry Weight Leaves	68
4.5.6. Mean Weight of Flower Buds and Seeds.....	69
4.6. Stomatal Characteristics of Colchiploids.....	70
4.7. Ploidy and Chromosome Number of Colchiploids.....	72
4.8. Yield of Triterpenoid Saponins in Colchiploids.....	73
4.9 Induction of Somaclonal Variations.....	77
4.9.1 Induction of Somaclonal Variations through Leaf explant Cultures.....	78
4.9.2. Shoot Initiation	80
4.9.3. Root Induction in Regenerated Plants.....	82
4.9.4. Transplantation to the Cultured Plants.....	83
5. DISCUSSION.....	85
5.1. Effects of Colchicine on Survival Rate	85
5.2. Effective Method of Colchicine Treatment for Induction of Autotetraploidy in <i>Centella</i>	86
5.3. Effective Concentration of Colchicine and Treatment Duration for Induction of Autotetraploidy.....	86
5.4. Impact of Induced Autotetraploidy on Morphometric Characters	87
5.5. Effect of Colchicine on Stomatal Characteristics	89
5.6 Effect of Colchicine on Ploidy Level	91
5.7 Induction of Somaclonal Variations in <i>Centella asiatica</i>	93
5.8. Effect of Induced Autotetraploidy on the Yield of Therapeutically Active Compounds.....	95
6. SUAMMARY AND CONCLUSON	98
6.1. Introduction.....	98
6.2. Materials and Methods.....	101
6.3. Experimental Results.....	103
6.3.1. Effective Method of Colchicine Treatment for Induction of Autotetraploidy in <i>Centella</i>	103
6.3.2. Effect of colchicine concentration on survival rate.....	103
6.3.1.3. Effect of Induction of Autotetraploidy on Stomatal Variation and Chromosome Number.....	103
6.3.3. Effective Concentration of Colchicine and treatment duration for Induction of Autotetraploidy in <i>Centella</i>	103

6.3.4. Establishment of Autotetraploidy in Colchicine treated <i>Centella</i> plants.....	104
6.3.5. Induction of Somaclonal Variations.....	105
6.3.5.1. Induction of Callus	105
6.3.5.2. Induction of Shoots.....	105
6.3.5.3. Induction of Roots	106
6.3.6. Biochemical Analysis of Autotetraploids of <i>Centella asiatica</i>	106
7. REFFERANCES.....	109
