Acknowledgements

First and foremost I would like to gratefully and sincerely thank Dr. Rishi Shanker for his guidance, understanding and patience. I appreciate all his contributions, time, ideas, and productive discussions. I am also thankful to him for the excellent support and motivation he has provided to complete the studies successfully.

I am especially grateful to my co-supervisor Prof. Harvinder Singh Saini, for his good advice, critical discussions and immense support throughout this work. He has been a great mentor and friendly advisor.

I am truly indebted and thankful to our Director Dr. Kailash Chand Gupta, who has been very encouraging and at the same time critical of me to complete the thesis as soon as possible.

I would like to acknowledge the help and advice provided by Dr. Sajid Hussain, Head of the Department, Dr. B. S. Chadha and other faculty members from Department of Microbiology, Guru Nanak Dev University, Amritsar, during my presentations which helped the work immensely. I would like to thank those members of my doctoral committee also for their input and valuable discussions.

I would like to express my sincere gratitude to Professor Michael Schloemann, presently at Technical University, Freiberg, Saxony, Germany for his guidance and support. The 2 years time I have spent in his laboratory at University of Stuttgart, Stuttgart, Germany, helped me to learn many basic molecular-microbiological techniques which were immensely useful in the present studies. My time at University of Stuttgart was made enjoyable in large part by many friends and groups that became a part of my life and particularly Dr. Stefan Kaschabek, Dr. Margit Mau, and Mr. Janosch Groening for their suggestions and help.

This dissertation would not have been possible unless Dr. Shanmugam Mayilraj who has encouraged me to complete the work. He had helped in bacterial phylogenetic studies with the pure cultures and also the bacterial community studies. My utmost appreciation for his unwavering moral support and friendship during the work.
I extend my deepest appreciation to Dr. Deepak Agarwal, a former Scientist in our institute for his advice, insightful criticisms and patient encouragement. I appreciate his valuable time for critically reading the thesis.

My time during the work was enjoyable in large part due to many friends and my laboratory students who had enriched me with their constant support.

I owe sincere and earnest thankfulness to my parents for inculcating high moral and support to achieve higher education in my career. My special gratitude is due to my uncle and my sister for their loving support.

I express my gratitude to my father in-law who shared his love for science and supported me in all my pursuits.

Lastly, I extend my appreciation to my children Sameer and Sabrina for all their love and encouragement and most of all my gratitude to my wife Sabiha Banu for her support, love and care, always.

N. Manickam
