ACKNOWLEDGEMENT

At the onset, I extend my sincere thanks to almighty for providing me the strength to pursue this research work and discover new horizons of ability during the pursuit.

I further take this opportunity to express my gratitude to my guide, Dr. Jaspal Singh for his constant support and guidance in the absence of which this research work would not have taken its current shape. His steady encouragement and positive words ensured that I was never short of motivation and self-belief, essential to complete this mammoth task. I am thankful for his help and his sharing of knowledge and insights on the subject.

My sincere thanks to Guru Nanak Dev University, Amritsar, for providing me access to different databases for collection of data and literature, and different softwares for data analysis.

My greatest sense of gratitude to my mother, for her constant faith and belief in my abilities and for always being around for me. I thank her for the immense help extended by her during the process of data collection. I am also grateful for her moral support and encouragement.

Lastly, this acknowledgement would be incomplete without making a mention of my father and brother who have been a constant source of motivation that has kept me going during the course of this research work.

Namrata Sandhu
