# Contents

Chapter 1: Preliminary Mathematical Concepts 1-32

1.1 Sets 1-2
1.2 Relations 2-3
1.3 Function 3-4
1.4 Scalars and Vectors 4-7
1.4.1 Vector Algebra 4-7
1.4.2 Kronecker Delta and Einstein Summation Convention 4-7

1.5 Matrix 7-10
1.5.1 Pseudo Inverse 7-9
1.5.2 Vector Norms and Matrix Norms 9-10

1.6 Decomposition 11-14
1.6.1 Eigen-value Decomposition 11-12
1.6.2 Singular Value Decomposition 12
1.6.3 QR Decomposition 12
1.6.4 Condition Numbers 12

1.7 Optimization Methods 15-20
1.7.1 Vector Gradient 15-16
1.7.2 Matrix Gradient 16
1.7.3 Taylor Expansion of Multivariate Functions 16
1.7.4 Unconstrained optimization 17

1.8 Dynamical System 20-21
1.9 Probability 21-22
1.10 Random Variables 22-24
1.11 Probability Distribution and Densities 24-25
1.12 Gaussian Distribution 25-26
1.13 Cauchy Distribution 27
1.14 Markov Process, Markov Chains, and Markov Chain Analysis 27-29
1.15 Bayes Decision Rule for Minimum Error 29-31

References 32

Chapter 2: Pattern Recognition: Scope and Techniques 33-80

2.1 Introduction 33-36

2.2 Statistical Methods 36-53
2.2.1 Parametric Methods 36-45
2.2.2 Nonparametric Methods 45-53
2.2.3 Linear Discriminant Functions and Classifiers 53-55

2.4 Structured Methods 55-58
2.4 Neural Network Based Methods 58-60
2.5 Fuzzy Based Methods 60-63
2.6 Handwritten Character Recognition 63-67
4.3.2 The Neural Network Architecture

4.4 The Genetic Algorithm Implementation 167-174
4.4.1 Genetic Representation
4.4.2 The Mutation Operator
4.4.3 Elitism
4.4.4 Selection
4.4.5 Crossover
4.4.6 The Fitness Evaluation Function

4.5 Results and Discussions 175-216
4.6 Conclusion 217-218

References 219-221

Chapter 5 Analysis for the Recognition of Scaled and Rotated Hand Written English Alphabets with Online Learning Implementation Using Soft-Computing Techniques. 222-261

5.1 Introduction 223-226
5.2 Scaling and Rotation 226-230
5.3 Present status of the trained network 230-234
5.4 Simulation design and implementation details 234-241
5.4.1 Experiment
5.4.2 The Neural Network Architecture
5.4.3 The Genetic Algorithm Implementation
5.5 Results and Discussions 241-261
