LIST OF FIGURES

CHAPTER –I

1.1 Location map of the study area.
1.2 Geological map of Karnataka.
1.3 Relation between hydro meteorological parameters.
1.4 Annual variation of rainfall.

CHAPTER –III

2.1 Location map of groundwater samples
2.2 Classification of irrigation water (Wilcox, 1948).
2.3 Classification of irrigation water (Richards, 1954).
2.4 Chemical types of ground water (Piper’s, 1944).
2.5 Mechanism controlling ground water chemistry (Gibb’s, 1970).
2.6 Location and Total hardness ranges of ground waters.
2.7 Location and TDS ranges of ground waters.
2.8 Location and chloride ranges of ground waters.
2.9 Chemical constituents in ground water during premonsoon at station I.
2.10 Chemical constituents in ground water during premonsoon at station II.
2.11 Chemical constituents in ground water during premonsoon at station III.
2.12 Chemical constituents in ground water during premonsoon at station IV.
2.13 Chemical constituents in ground water during premonsoon at station V.
2.14 Chemical constituents in ground water during monsoon at station I.
2.15 Chemical constituents in ground water during monsoon at station II.
2.16 Chemical constituents in ground water during monsoon at station III.
2.17 Chemical constituents in ground water during monsoon at station IV.
2.18 Chemical constituents in ground water during monsoon at station V.
2.19 Chemical constituents in ground water during postmonsoon at station I.
2.20 Chemical constituents in ground water during postmonsoon at station II.
2.21 Chemical constituents in ground water during postmonsoon at station III.
2.22 Chemical constituents in ground water during postmonsoon at station IV.
2.23 Chemical constituents in ground water during postmonsoon at station V.
2.24 Trace element concentration in ground water during premonsoon at station I.
2.25 Trace element concentration in ground water during premonsoon at station II.
2.26 Trace element concentration in ground water during premonsoon at station III.
2.27 Trace element concentration in ground water during premonsoon at station IV.
2.28 Trace element concentration in ground water during premonsoon at station V.
2.29 Trace element concentration in ground water during monsoon at station I.
2.30 Trace element concentration in ground water during monsoon at station II.
2.31 Trace element concentration in ground water during monsoon at station III.
2.32 Trace element concentration in ground water during monsoon at station IV.
2.33 Trace element concentration in ground water during monsoon at station V.
2.34 Trace element concentration in ground water during postmonsoon at station I.
2.35 Trace element concentration in ground water during postmonsoon at station II.
2.36 Trace element concentration in ground water during postmonsoon at station III.
2.37 Trace element concentration in ground water during postmonsoon at station IV.
2.38 Trace element concentration in ground water during postmonsoon at station V.

CHAPTER -III

3.1 Location map of waste water sampling spots.
3.2 Chemical constituents in waste water during premonsoon.
3.3 Chemical constituents in waste water during monsoon.
3.4 Chemical constituents in waste water during postmonsoon.
3.5 Trace elements concentration in waste water during premonsoon.
3.6 Trace elements concentration in waste water during monsoon.
3.7 Trace elements concentration in waste water during postmonsoon.

CHAPTER -IV

4.1 Location map of pond water sampling.
4.2 Average chemical constituents in Devargudihal pond water.
4.3 Average chemical constituents in Tarihal pond water.
4.4 Average chemical constituents in Basaveshwar Nagar pond water.
4.5 Average trace elements concentration in Devargudihal pond water.
4.6 Average trace elements concentration in Tarihal pond water.
4.7 Average trace elements concentration in Basaveshwar Nagar pond water.
4.8 Physico-chemical properties of pond waters during premonsoon.
4.9 Physico-chemical properties of pond waters during monsoon.
4.10 Physico-chemical properties of pond waters during postmonsoon.
4.11 Trace elements concentration in pond water during premonsoon.
4.12 Trace elements concentration in pond water during monsoon.
4.13 Trace elements concentration in pond water during postmonsoon.

CHAPTER V

5.1 Location map of pond sediments sampling.
5.2 Average trace elements content in Devargudihal pond sediments at Location I.
5.3 Average trace elements content in Devargudihal pond sediments at Location II.
5.4 Average trace elements content in Devargudihal pond sediments at Location III.
5.5 Average trace elements content in Devargudihal pond sediments at Location IV.
5.6 Average trace elements content in Devargudihal pond sediments at Location V.
5.7 Average trace elements content in Tarihal pond sediments at Location I.
5.8 Average trace elements content in Tarihal pond sediments at Location II.
5.9 Average trace elements content in Tarihal pond sediments at Location III.
5.10 Average trace elements content in Basaveshwar Nagar pond sediments at Location I.
5.11 Average trace elements content in Basaveshwar Nagar pond sediments at Location II.
5.12 Average trace elements content in Basaveshwar Nagar pond sediments at Location III.
5.13 Trace elements content in Devargudihal pond sediments during premonsoon at Location I.
5.14 Trace elements content in Devargudihal pond sediments during premonsoon at Location II.
5.15 Trace elements content in Devargudihal pond sediments during premonsoon at Location III.
5.16 Trace elements content in Devargudihal pond sediments during premonsoon at Location IV.
5.17 Trace elements content in Devargudihal pond sediments during premonsoon at Location V.
5.18 Trace elements content in Devargudihal pond sediments during monsoon at Location I.
5.19 Trace elements content in Devargudihal pond sediments during monsoon at Location II.
5.20 Trace elements content in Devargudihal pond sediments during monsoon at Location III.
5.21 Trace elements content in Devargudihal pond sediments during monsoon at Location IV.
5.22 Trace elements content in Devargudihal pond sediments during monsoon at Location V.
5.23 Trace elements content in Devargudihal pond sediments during postmonsoon at Location I.
5.24 Trace elements content in Devargudihal pond sediments during postmonsoon at Location II.
5.25 Trace elements content in Devargudihal pond sediments during postmonsoon at Location III.
5.26 Trace elements content in Devargudihal pond sediments during postmonsoon at Location IV.
5.27 Trace elements content in Devargudihal pond sediments during postmonsoon at Location V.
5.28 Trace elements content in Tarihal pond sediments during premonsoon at Location I.
5.29 Trace elements content in Tarihal pond sediments during premonsoon at Location II.
5.30 Trace elements content in Tarihal pond sediments during premonsoon at Location III.
5.31 Trace elements content in Tarihal pond sediments during monsoon at Location I.
5.32 Trace elements content in Tarihal pond sediments during monsoon at Location II.
5.33 Trace elements content in Tarihal pond sediments during monsoon at Location III.
5.34 Trace elements content in Tarihal pond sediments during postmonsoon at Location I.
5.35 Trace elements content in Tarihal pond sediments during postmonsoon at Location II.
5.36 Trace elements content in Tarihal pond sediments during postmonsoon at Location III.
5.37 Trace elements content in Basaveshwar Nagar pond sediments during premonsoon at Location I.
5.38 Trace elements content in Basaveshwar Nagar pond sediments during premonsoon at Location II.
5.39 Trace elements content in Basaveshwar Nagar pond sediments during premonsoon at Location III.
5.40 Trace elements content in Basaveshwar Nagar pond sediments during monsoon at Location I.
5.41 Trace elements content in Basaveshwar Nagar pond sediments during monsoon at Location II.
5.42 Trace elements content in Basaveshwar Nagar pond sediments during monsoon at Location III.
5.43 Trace elements content in Basaveshwar Nagar pond sediments during postmonsoon at Location I.
5.44 Trace elements content in Basaveshwar Nagar pond sediments during postmonsoon at Location II.
5.45 Trace elements content in Basaveshwar Nagar pond sediments during postmonsoon at Location III.

CHAPTER VI

6.1 Location map of soil sampling spots.
6.2 Average trace elements content in soils at station I.
6.3 Average trace elements content in soils at station II.
6.4 Average trace elements content in soils at station III.
6.5 Average trace elements content in soils at station IV.
6.6 Average trace elements content in soils at station V.
6.7 Trace elements content in soils during premonsoon at station I.
6.8 Trace elements content in soils during premonsoon at station II.
6.9 Trace elements content in soils during premonsoon at station III.
6.10 Trace elements content in soils during premonsoon at station IV.
6.11 Trace elements content in soils during premonsoon at station V.
6.12 Trace elements content in soils during monsoon at station I.
6.13 Trace elements content in soils during monsoon at station II.
6.14 Trace elements content in soils during monsoon at station III.
6.15 Trace elements content in soils during monsoon at station IV.
6.16 Trace elements content in soils during monsoon at station V.
6.17 Trace elements content in soils during postmonsoon at station I.
6.18 Trace elements content in soils during postmonsoon at station II.
6.19 Trace elements content in soils during postmonsoon at station III.
6.20 Trace elements content in soils during postmonsoon at station IV.
6.21 Trace elements content in soils during postmonsoon at station V.

CHAPTER VII

7.1 Location map of plant leaves sampling.
7.2 Average trace elements deposition on plant leaves at site I
7.3 Average trace elements deposition on plant leaves at site II
7.4 Average trace elements deposition on plant leaves at site III
7.5 Average trace elements deposition on plant leaves at site IV
7.6 Trace elements deposition on plant leaves during premonsoon at site I.
7.7 Trace elements deposition on plant leaves during premonsoon at site II.
7.8 Trace elements deposition on plant leaves during premonsoon at site III.
7.9 Trace elements deposition on plant leaves during premonsoon at site IV.
7.10 Trace elements deposition on plant leaves during monsoon at site I.
7.11 Trace elements deposition on plant leaves during monsoon at site II.
7.12 Trace elements deposition on plant leaves during monsoon at site III.
7.13 Trace elements deposition on plant leaves during monsoon at site IV.
7.14 Trace elements deposition on plant leaves during premonsoon at site I.
7.15 Trace elements deposition on plant leaves during premonsoon at site II.
7.16 Trace elements deposition on plant leaves during premonsoon at site III.
7.17 Trace elements deposition on plant leaves during premonsoon at site IV.
