ACKNOWLEDGEMENT
ACKNOWLEDGEMENT

It gives me great pleasure to thank my guide and supervisor Dr. (Mrs) SHASHI B. SINGH, Scientist ‘E’, Department of Electrophysiology, Defence Institute of Physiology and Allied Sciences. With respect I record here my deep sense of gratitude and indebtedness for her invaluable guidance, suggestions, encouragement and care throughout the study. Her concern towards me is beyond words. I feel privileged to have gained from her immense knowledge and guidance, for which I am extremely thankful.

I gracefully acknowledge here the permission and encouragement given by the Defence Research and Development Organization (DRDO), which enabled me to take up the investigation. With utmost sincerity I am ever thankful to Dr. P. K. BANERJEE, Director, Defence Institute of Physiology and Allied Sciences for providing all facilities in the Institute during the investigation.

I am bereft of expression due to limited vocabulary to express my extreme indebtedness and regards to Dr. G. ILAVAZHAGAN, Scientist ‘F’ and Head of the Department, Department of Physiology, Defence Institute of Physiology and Allied Sciences who spared his precious time to guide me throughout my study which lead to the successful completion and useful conclusions of the study.

I will be failing in duty if I do not acknowledge my deep sense of gratitude to Dr. M. SAIRAM, Scientist ‘E’, Department of Experimental Biology, Defence Institute of Physiology and Allied Sciences, who through his dedicated efforts and guidance trained me in various in vitro investigations in the study, without which the studies would have been lame and inconclusive.

With profound pleasure, I express my deep sense of gratitude to Mr. K. SRIDHARAN, former head of the Nutrition division, Defence Institute of Physiology and Allied Sciences for his critical evaluations and adequate advice. His advise and critical suggestions helped me to complete thesis successfully. For that I would be thankful to him throughout my life.

I record my sincere gratitude to the authorities of Bharathiar University, Coimbatore and specially Dr. S. BALASUBRAMANIAN, Professor,
Department of Environmental Sciences, Bharathiar University, Coimbatore for providing financial support through fellowship for the execution of the study. I am proud to record here this help, without which I would not have ventured to pursue my doctoral program. Dr. S. Balasubramanian encouraged and supported me throughout.

I had the training at NIMHANS on hippocampal cell culture and Morris water maze techniques, which formed the hub of the study. This was through the guidance of Dr. T. R. RAJU, Head, Department of Neuorphysiology, Dr. B.S. SANAKARANARAYA RAO, Assistant Professor, Department of neuorphysiology, and Dr. BINDU KUTTY, Assistant Professor, Department of Neuorphysiology, NIMHANS, Bangalore, for which I will be indebted throughout my life.

My sincere thanks to Dr. (Mrs) S. GEETHA, Scientist ‘C’ and Dr. K. HARINATH, Scientist ‘C’, Defence Institute of Physiology and Allied Sciences for their constant encouragement and suggestions during the investigation.

I extend my thanks to Mrs. SAROJ B. CHOPRA and Mr. DEEPAK RAWAT for helping me in the typing work and to Mr. AMITABH, ‘STA’ and Mr. ALPHESH KUMAR SHARMA, ‘STA’ for their constant help to complete this work.

I owe my special thanks to my colleagues Mr. MUTHURAJU, Ms. KALPANA BHARWAL, Ms. MOHITA SHRIVASTAVA, Mr. SUNIL KUMAR HOTA, Mr. MAITI for their constant encouragement and help in the investigation.

Keeping the tradition of expressing the feelings and emotions while coming to the stage of completion of any important investigation, I record here my sincere thanks to my parents and sisters for encouraging me to pursue the doctoral program after completing my post-graduate studies. Their wishes and blessings have culminated into success of this investigation. I gracefully acknowledge this and record here.

Once again, I thank all those who have encouraged me throughout the study.

(K.JAYALAKSHMI)
