ACKNOWLEDGEMENTS

The author does not have enough words to describe the profound gratitude and sense of indebtedness which he feels to express towards Dr. R. C. Hooda, Reader, Department of Education, M. D. University, Rohtak, for his invaluable guidance, constant encouragement, continued interest, persistent and useful suggestions, moral support and for making an environment conducive during the course of investigation reported in the present thesis. Without his constant help and keen interest, it would have been difficult for the author to sustain his efforts upto its completion.

Thanks are also due to author's venerable teachers Dr. D. K. Chadda, Reader and Head, and Dr. B. S. Dagaur, Reader, Department of Education, M. D. University, Rohtak, who have been kind enough to extend all necessary facilities for the present work.

The author expresses his deep and sincere gratitude and personal acknowledgements to his uncle Sh. R. P. Sharma and Sh. A. R. Sharma, Assistant Engineers, All India Radio, Rohtak, for their gracious help. They took pains and interest for their cooperation extended during the research, specially for their assistance in the preparation of video lessons.
The encouragement, cooperation and unstinted help received whenever needed at various stages of this investigation from his friends Sh. Ramesh Dabas, Lecturer, Jat College, Rohtak, Dr. D. C. Spah, Department of Chemistry, M. D. University and Sh. Sameer Dalal, Computer Centre, M. D. University, Rohtak, is also thankfully acknowledged.

Heartbound thanks are also towards various Headmasters, Staffmembers and students of the secondary schools who participated in the experiment and cooperated in collecting the data for the present research.

At last but not the least, the author wishes to express his deep appreciation and sincere regards to his parents, brothers and wife, for being the source of sustained encouragement and support.

Lecturer, ( R. C. Sharma )
C. R. College of Education,
Rohtak.
