Acknowledgements

This thesis arose in part out of years of research that has been done since I came to Plant Biotechnology Group at the Department of Botany, Aligarh Muslim University, Aligarh, India. By that time, I have worked with a great number of people whose contribution in assorted ways to the research and the making of the thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

In the first place I would like to record my gratitude to Professor M. Anis (The Chairman and my Supervisor) for his direction, advice and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work. Above all and the most needed, he provided me unflinching encouragement and support in various ways. His truly scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a scientist want to be. I am indebted to him more than he knows. I gratefully acknowledge him for crucial contribution, which made him a backbone of this research and so to this thesis. His involvement with his originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. Sir, I am grateful in every possible way and hope to keep up our association in the future.

I would like to thank Dr. Anwar Shahzad (Asst. Prof., Department of Botany, AMU) for being the first person who taught me how to work in plant tissue culture system. I am proud to record that I had few opportunities to work with an experienced scientist like him.

I would also acknowledge Dr. Hina Khan (Asst. Prof., Patiala University, Punjab), Dr. Mohd. Faisal (Asst. Prof., King Saud University, Riyadh), Dr. Mohd. Kashif Hussain and Dr. Naseem Ahmad (Young Scientist, DST-FAST Track Scheme, Deptt. of Botany,
AMU) for their advice and willingness to share their bright thoughts with me, which was very fruitful for shaping up my ideas and research.

I am very much gratified to Dr. Iram Siddique (Asst. Prof., King Saud University, Riyadh) for the proposition and lending a hand in the smooth progress of my work throughout the research period without which it would have been difficult for me to achieve my goals.

Many thanks go in particular to Dr. Anushi Arjumend Jahan. I am much indebted to Anushi for her valuable advice in science discussion, supervision of thesis and furthermore, using her precious times to read this thesis and gave her critical comments about it.

Collective and individual acknowledgments are also owed to my colleagues at Plant Biotechnology Lab whose present somehow perpetually refreshed, helpful, and memorable. Many thanks go in particular to Ms. Shahina Parveen, Ms. Nigar Fatima, Ms. Shiwali Sharma, Ms. Shahnaz Perveen, Ms. Ruphi Naz, Mr. Mohd Rafeeq Ahmed, Mr. Saadbin Javed, Mr. Mohd. Imran Khan, Ms. Arjumend Shaheen and Ms. Taiba Saeed for giving me such a pleasant time when working together with them since I knew them in lab.

I am also thankful to Dr. S.I. Ahmed, Arid Forest Research Institute (AFRI), Jodhpur, India, for his enormous cooperation and help in the collection of the plant material during the research period.

I convey my special acknowledgement to fellows Dr. S. Arif Wali, Dr. Shashi Bhushan, Dr. Madan Singh Negi and Mr. Shyam Sundar Sharma (SRF-CSIR) from TERI, New Delhi, India for their indispensable help dealing with work on genetic fidelity of TC-raised plants during the research period.

I wish to acknowledge Mr. Yogendra Kumar for mastery photography.
Financial support from UGC in the form of Project Fellow in a major research project on Balanites aegyptiaca (2007-2009) and Non-Net fellowship (2011-2012) is greatly acknowledged.

Where would I be without my family? My family deserves special mention for their inseparable support and prayers. My Father, Mr. Arvind Kumar, in the first place is the person who put the fundament my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Mrs. Archana Varshney, is the one who sincerely raised me with her caring and gently love. Er. Ashish Kumar, thanks for being supportive and caring brother.

Words fail me to express my appreciation to my friends Anushi A. Jahan, Seemab Mukhtar, Shahina Parveen, Honey Gupta, Zeba Khan, Shweta Jain, Samreen Manzoor, Sheeba Zaki, Sana Naseem, Hamid Iqbal Tak, Abhishek Tiwari, Saurabh Chawla whose dedication, love and persistent confidence in me, has taken the load off my shoulder. I owe them for being unselfishly let their intelligence, passions and ambitions collide with mine.

Furthermore, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Ultimately, I am thankful to the Almighty God for blessing me to complete this work successfully.

(Ms. Ankita Varshney)
