A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of three and a half years whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them. This is an impossible task. I am going to try it anyway, and if your name is not listed, rest assured that my gratitude is not less than for those listed below.

With a deep sense of gratitude, I wish to express my sincere thanks to my supervisor, Dr. S.S. Chahal, the former Head, Department of Commerce, M. D. University, Rohtak and Professor at the Department of Commerce, M D University, Rohtak, for immense help in planning and executing the work in time. The confidence and dynamism with which Prof. Chahal guided the work requires no elaboration. His overly enthusiasm and integral view on research and his mission for providing ‘only high quality work and not less than that’, has made a deep impression on me. I owe him lots of gratitude for having shown me this way of research. What I have known today about the process of research, I learned from Prof. Chahal. He could not even realize how much I have learned from him. My sincere thanks are due to Prof. S.D.Vashishtha, Head, Department of Commerce, M.D. University, Rohtak, who mentioned my work and took effort in reading and providing me with valuable comments on earlier version of this thesis.
