ACKNOWLEDGEMENTS

In conducting this research, I have received generous help in form of guidance from many quarters, which I would like to put on record here with deep gratitude and great pleasure. I take this opportunity to express my deep sense of gratitude to my research supervisor, Dr. J.C. Sharma, Professor, Department of Geography, Himachal Pradesh University, Shimla, who has been a pillar of strength and support in inspiring me and providing me guidance and help. His able guidance, affectionate encouragement and critical suggestions went a long way in providing me the necessary insight into the problem. Without his inspiration and invaluable suggestions it would not have been possible for me to carry out this present investigation. His encouragement and blessing have opened the path for further research.

I also wish to extend my thanks to all the faculty members of the Department of Geography for their ever available cooperation and moral support.

My deepest gratitude is devoted to my parents, my brother and sisters who have always been a source of encouragement and inspiration during my research work.

I am grateful to UGC, New Delhi, for providing me necessary financial support as a JRF and SRF during the research period, without which this thesis could not have been a reality.
