The present study is an empirical work on emerging leadership in Panchayats of Himachal Pradesh in post 73rd amendment period. It throws light on the various aspects (theoretical and practical) of panchayati raj system in the state. The objectives of panchayati raj is to make democracy real from the below (grass roots). It imparts political education to the masses and give a valuable ground for rural leadership. 73rd constitutional amendment was really a radical step towards village swaraj. Democratic decentralization is the major thrust of the Act and it ensure people’s participation and involvement in the development process.
