Acknowledgement

Words and lexicons cannot do full justice in expressing my reverence to Prof. (Dr.) Roop K Khar, Department of Pharmaceutics, Faculty of Pharmacy, Hamdard University, New Delhi under whose benevolence and able guidance, I studied, learned and able to successfully write my Ph.D. thesis work. I take this opportunity to acknowledge most humbly my indebtedness for their guidance and relevant discussions. The present work bears at every stage his wise counsel and the impress of her concrete, able, reasoned and careful constructive suggestions and constant attention. I am also deeply grateful to my co-supervisor Dr. F. J. Ahmad for his support and valuable inputs.

I sincerely thank Prof. Asgar Ali, Head of Department of Pharmaceutics, whose open mindedness and vast knowledge helped me a lot. I also thank him for providing all the necessary facilities in the department and making this project feasible.

I earnestly wish to make special mention to Prof. Rasheeduz Zafar, Dean, Faculty of Pharmacy, Jamia Hamdard, for his extreme co-operative and moral support throughout the project.

I owe gratitude to (Late) Janab Hakeem Abdul Hameed sb., Founder of Jamia Hamdard, and an extraordinary personality with great vision for future, for his devoted efforts to build a great atmosphere for research and education in form of Jamia Hamdard.

I would like to extend my gratitude to all teachers of my Faculty for their constant encouragement and co-operation.

It is my pleasant duty to convey me affectionate thanks to my co-supervisor Prof. Gerrit Borchard, Section of Pharmaceutical Sciences, University of Geneva,
Geneva, Switzerland for providing his valuable suggestions and help to carry out this research work.

I also like to acknowledge and thank Council for Scientific and Industrial Research (CSIR), New Delhi and for providing research fellowship, which helped throughout the project.

I am also thankful to Federal Commision for Scholarship, Switzerland for providing me financial support to carry out the part of research work from University of Geneva.

The assistance provided by the staff of CIL, Animal house and Department of Pharmaceutics, in the experimental work is gratefully acknowledged.

I am indebted to Mr. Anurag, Gattefosse for providing us gift samples and his valuable suggestions as and when required.

I would like to extend my affectionate thanks to Dr. Gaurav Kumar Jain, Dr. Shadab Pathan, Dr.Nilu Jain, Dr. Sohail Hasan for their valuable suggestions and continuous help regarding this work.

A word of thanks to my friends, Sunny, Arvind, Rishi, Khagesh, Musarrat, Anwar for helping and guiding me through thick and thin.

Finally, I would like to thank my loving parents, my sister Dr. Richa, brother in-law Dr. Prashant, my brother Shitanshu, my best friend and wife Manika for all their constant inspiration and affectionate help at various stages enabled me to carry out this work.
