ACKNOWLEDGEMENT

First of all I would like to thank Almighty for his blessings, which has guided me throughout the execution of this work.

It is pleasure to me for recording a sense of long time gratitude to my guide Dr. K.S.R Anjaneyulu Professor of Electrical & Electronics Engineering JNTU College of Engineering, Anantapur for his continuous help, directions with love, laced with friendship, support and advice throughout the period of research work.

The author also likes to thank Mrs. P. Sujatha, Associate Professor of Electrical & Electronics Engineering Department, JNTU College of Engineering, Anantapur, for her encouragement & support.

The author is highly indebted to JNTU Hyderabad and JNTU Anantapur for permitting me to do this work with the available facilities.

The author also wishes to express thanks to the authorities of Royal Institute of Technology & Science, Dammergidda-Chevella, for extending help throughout the research work.

The special appreciations go to the family members for their patience and immense support in all respect during this research work.

Sardar Ali
