Acknowledgments

Writing this thesis has been fascinating and extremely rewarding. Starting with a vague idea of Optimization Techniques in Operations Research, it evolved into its present form.

It gives me immense pleasure to express my gratitude to my supervisor Dr. Anjana Gupta, for her guidance, inspiration and above all, her support for carrying out this work. Throughout my thesis-writing period, she provided sound advice, good company and lots of good ideas.

I would also like to thank the reviewers of our papers and the academicians whom I have met over the past years at various conferences and workshops; for their valuable suggestions and comments which motivated me to look into areas which we never thought of venturing into.

Sincere thanks to Maharaja Agrasen Institute of Technology (M.A.I.T.) authorities for providing me necessary facilities for the smooth completion of my work. I would like to give special thanks to all my friends, for their help and moral support during my study.

I am indebted to my husband Dr. Devender Bagla, my son Nishant, daughter Shruti and my father in law Dr. B.S. Bagla for their tremendous support and patience throughout my study period.

Very special thanks go to my brothers Dr. Sanjay Dhingra and Mr. Ajay Dhingra for their help, support and motivation to my study and research.

Applications of Vector Optimization Problems
I would like to express my deepest regards and gratitude to my parents for their unmitigated love, encouragement, understanding, unfailing faith and support. To them I dedicate this thesis.

Vandana Bagla
