CONTENTS

CHAPTER I. INTRODUCTION.................................1 - 7.

CHAPTER II. REVIEW OF LITERATURE..................8 - 43

1.0 Toxicity Studies.

2.0 Accumulation of pesticides in aquatic ecosystem.

3.0 Degradation of pesticides in aquatic ecosystem.

4.0 Effects of pesticides on oxygen consumption.

CHAPTER III. MATERIALS AND METHODS...............44 - 77

1.0 Toxicity studies.

2.0 Accumulation of organophosphorus pesticides in aquatic ecosystem.

3.0 Identification of pesticide residues and their metabolites in animal tissues.

4.0 Oxygen consumption by aquatic animals.

CHAPTER IV. RESULTS........................................78 - 110

1.0 Toxicity studies.

2.0 Accumulation of organophosphorus pesticides in aquatic ecosystem.
2.1 Accumulation of malathion residues in aquatic ecosystem.

2.2 Accumulation of methyl parathion residues in aquatic ecosystem.

3.0 Biodegradation of organophosphorus pesticides in aquatic animals.

3.1 Biodegradation of malathion in the snail, Bellamya bengalensis.

3.2 Biodegradation of malathion in the fish, Labeo rohita.

3.3 Biodegradation of methyl parathion in the snail, Bellamya bengalensis.

3.4 Biodegradation of methyl parathion in the fish, Labeo rohita.

4.0 Oxygen consumption by aquatic animals.

4.1 Oxygen consumption by the snail, Bellamya bengalensis.

4.2 Oxygen consumption by the fish, Labeo rohita.

CHAPTER V. DISCUSSION..................111 - 142

1.0 Toxicity studies.

2.0 Accumulation of organophosphorus pesticides in aquatic ecosystem.

3.0 Biodegradation of organophosphorus pesticides in aquatic animals.

4.0 Oxygen consumption by aquatic animals.

CHAPTER VI. SUMMARY........................143 - 146

REFERENCES..................................147 - 196
