

# Table of Contents

<b>Table of Contents</b>	<b>x</b>
<b>List of Tables</b>	<b>xiv</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Crossover design . . . . .	1
1.1.1 Crossover design can improve precision and reduce the cost . . .	2
1.1.2 Prerequisites for application of crossover design . . . . .	4
1.1.3 Factors in crossover design . . . . .	5
1.1.4 Areas where crossover design is used . . . . .	7
1.2 Various models estimable through crossover designs . . . . .	8
1.3 Estimation of carryover models . . . . .	10
1.4 ANOVA of carryover models . . . . .	11
1.5 Selection of a design from a class $COD(t, n, p)$ . . . . .	12
1.5.1 Characterization of crossover designs . . . . .	13
1.5.2 Optimality of crossover designs . . . . .	15
1.5.3 Efficiency of separability of crossover designs . . . . .	17
<b>2 Construction of Minimal Balanced Crossover Designs for Carryover Models</b>	<b>21</b>
2.1 Introduction . . . . .	21
2.2 Preliminaries and new definitions . . . . .	23
2.2.1 Model and ES . . . . .	23
2.2.2 Definitions of terraces . . . . .	24
2.3 Method of construction . . . . .	26
2.3.1 Minimal balanced $COD(t, n, p(< t))$ . . . . .	26
2.3.2 Minimal balanced $COD(t, t, t)$ . . . . .	33
2.3.3 Minimal balanced $COD(t, t, p(> t))$ . . . . .	35

<b>3</b>	<b>Estimation of Treatment and Higher Order Carryover Effects for Equineighbored Crossover Design with Application to interim Analysis</b>	<b>40</b>
3.1	Introduction . . . . .	40
3.2	The higher order carryover model and nuances equineighbored crossover design . . . . .	42
3.2.1	The model . . . . .	43
3.2.2	The Efficiency of Separability . . . . .	44
3.2.3	Construction of $ECO(t, t(t-1), p)$ design . . . . .	47
3.3	Estimation of higher order carryover model for $ECO(t, t(t-1), p)$ design	49
3.3.1	Estimation of treatment effects for $ECO(t, t(t-1), p(\leq t))$ design	51
3.3.2	Variance balance of $ECO(t, t(t-1), p(\leq t))$ design . . . . .	52
3.3.3	Estimation of treatment effects for $ECO(t, t(t-1), p(\leq t))$ design with scattered missing observations . . . . .	55
3.3.4	Estimation of treatment effects for $ECO(t, t(t-1), p(\leq t))$ design at interim stage for early stopping . . . . .	56
3.4	Numerical illustration . . . . .	57
3.4.1	Estimation with complete data . . . . .	57
3.4.2	Estimation with one missing observation . . . . .	59
3.4.3	Estimation with unit dropout . . . . .	59
3.4.4	Interim stage estimation . . . . .	60
3.4.5	Discussion . . . . .	61
<b>4</b>	<b>Optimal and Efficient Two Treatment Crossover Designs for Carry-over Models</b>	<b>62</b>
4.1	Introduction . . . . .	62
4.2	Models and optimality criterion . . . . .	64
4.2.1	Modified models . . . . .	64
4.2.2	Variances of treatment contrasts . . . . .	66
4.2.3	The 5M algorithm . . . . .	78
4.3	Two treatment two period crossover designs . . . . .	84
4.3.1	Optimal crossover designs under NCM . . . . .	84
4.3.2	Optimal crossover designs under TSM, TBM and SSM . . . . .	86
4.3.3	Efficient crossover designs under NCM, TSM, TBM and SSM . . . . .	88
4.4	Two treatment three period crossover designs . . . . .	89
4.4.1	Optimal crossover design under NCM . . . . .	89
4.4.2	Optimal crossover designs under TSM and TBM . . . . .	91
4.4.3	Optimal crossover designs under SSM . . . . .	92

4.4.4	Optimal crossover designs under SBM . . . . .	93
4.4.5	Efficient crossover designs under NCM, TSM, TBM, SSM and SBM . . . . .	94
4.5	Two treatment four period crossover designs . . . . .	95
4.5.1	Optimal crossover designs under NCM, TSM, TBM and SSM	97
4.5.2	Optimal crossover designs under SBM . . . . .	98
4.5.3	Efficient crossover designs under NCM, TSM, TBM, SSM and SBM . . . . .	99
<b>5</b>	<b>Analysis of a Three Treatments Crossover Design for the First Order Carryover Model</b>	<b>100</b>
5.1	Introduction . . . . .	100
5.2	The model and characterization of $COD(2 + 1, 6, 3)$ . . . . .	102
5.2.1	The model and notation . . . . .	103
5.2.2	Characterization of $COD(3, 6, 3)$ as $COD(2 + 1, 6, 3)$ . . . . .	103
5.3	Analysis . . . . .	104
5.3.1	Tests of carryover effect . . . . .	104
5.3.2	Estimation in fixed effects carryover models . . . . .	105
5.3.3	ANOVA for various effects of carryover models . . . . .	109
5.4	Example . . . . .	113
<b>6</b>	<b>Optimal and Efficient Crossover Designs in One Placebo and Two Active Treatments for Carryover Models</b>	<b>118</b>
6.1	Introduction . . . . .	118
6.2	Models and its estimation . . . . .	119
6.2.1	Modified models . . . . .	119
6.2.2	Variances of treatment contrasts . . . . .	121
6.2.3	The 5M Active Algorithm . . . . .	124
6.3	Two active treatments and one placebo in two period crossover designs	130
6.3.1	Optimal crossover designs under NCM, TSM and TBM . . . . .	131
6.3.2	Optimal crossover designs under SSM and SBM . . . . .	133
6.3.3	Efficient crossover designs under NCM, TSM, TBM and SSM	134
6.4	Two active treatments and one placebo in three period crossover designs	137
6.4.1	Optimal crossover designs under NCM, TSM, TBM and SSM	138
6.4.2	Optimal crossover designs under SBM . . . . .	141
6.4.3	Efficient crossover designs under NCM, TSM, TBM, SSM and SBM	143
6.5	Two active treatments and one placebo in four period crossover designs	145
6.5.1	Optimal crossover designs under NCM, TSM, TBM and SSM	147

6.5.2	Optimal crossover designs under SBM . . . . .	148
6.5.3	Efficient crossover designs under NCM, TSM, TBM, SSM and SBM . . . . .	149
<b>7</b>	<b>Optimal and Efficient Crossover Designs Balanced for Carryover of Active Treatments</b>	<b>151</b>
7.1	Introduction . . . . .	151
7.2	New definitions, model and its estimation . . . . .	152
7.2.1	New definitions . . . . .	152
7.2.2	Model . . . . .	154
7.2.3	Variances of treatment contrasts under five models . . . . .	154
7.2.4	The 5M Active balanced algorithm . . . . .	162
7.3	Optimal and Efficient active balanced uniform on period Crossover Design . . . . .	169
7.3.1	Optimal crossover design under NCM,TSM,TBM . . . . .	172
7.3.2	Optimal crossover designs under SSM . . . . .	173
7.3.3	Optimal crossover designs under SBM . . . . .	174
7.3.4	Efficient crossover designs under NCM, TSM, TBM, SSM and SBM . . . . .	176
	<b>Conclusion</b>	<b>178</b>
	<b>Summary</b>	<b>182</b>
	<b>Appendix</b>	<b>184</b>
	<b>Research Papers Published/Communicated</b>	<b>191</b>
	<b>Bibliography</b>	<b>192</b>
